Upon completion of the course, students can take part in a flexible startup program where they liaise with faculty and staff in order to prepare themselves for professional life as a life coach.

Realization

We explore the characteristics of the 10 biggest threats to humanity: 1. World Population Growth. 2. Contamination and Pollution. 3. Climate Change. 4. Ecosystems. 5. Economy. 6. Politics and Governance. 7. Mass Media. 8. Public Education. 9. Religions. 10. Prenatal and postnatal mind development.

We analyze the development of the mind (mental functions) and the mental factors in all areas of human life. We draw a new understanding of life, ways of living, managing a relationship and marriage between man and woman, and an evolutionary concept of governance, economy, and public education.

We draw a 'Roadmap' for national and global changes and renewal within 25 years. Fundamental factors are: accumulation, growth, momentum, dynamics, human factors, and interdependences. To reduce, eliminate, replace and change the critical factors we consider different aspects of sustainability for human evolution.

For defining changes and renewals we adapt a new concept of man and archetypal human evolution together with core principles, rules and strategic aspects for aims, practical design, and processing implementations. The fundamental interest is: To bring humanity on the track of archetypal human evolution.

Additionally, twice per week: Advanced personal development, dreams, meditation, and energy practices. We discuss the consequences of a new advanced personal development for leaders and in general for experts in Life Coaching & Change Expertise, for the world population and human evolution in general.

General aim for the world: Drastic reduction and elimination of the mega-criticalities with a roadmap of 25 years.

A personal word from the Founder and President of the Schellhammer Institute:

"Sometimes it could be recommendable to see the 'impossible' from a completely new perspective. Sometimes it could also be advisable to consider that the enlightenment about "the earth is not flat" is also relevant today for many global concerns. In that sense it would be wise to consider that the Schellhammer Institute disposes of a 'millennium key' that 5.6 billion people on earth wish to be vivid and authentic in order to make the 'impossible solutions' feasible for the new millennium of human evolution. Everything else leads humanity into a global Armageddon within 20-35 years. Thus, humanity has reached the point of no return and with that enters into the first phase of complete elimination of humanity. There are the all-powerful string-pullers behind the curtains that want to destroy the divine creation; and this is not a conspiracy!"

The Schellhammer Institute also offers advanced programs of Personal Development for Individuation (2 weeks) and sessions for Individuation.
