Dr. Edward Schellhammer

Probably the last Prophet to visit this Planet

## The Pillars of Archetypal Human Evolution

### 1. Early Positive Mind Shaping

#### Human life starts with the fetus

- A fetus has a soul; the soul (an energetic body) has a natural (also energetic) ability to perceive external realities.
- A fetus can recognize the truth even though the state of brain development does not capacitate such perception.
- The soul of a fetus also has a general scale for what is good and bad (evil).

➔ *A fetus has a natural basic conscience (disposition) that has to be developed like the mental functions (mind).*

➔ *The first mental shaping processes, prenatal and during the first 5 years, decisively form the foundation of a life course.*

### Prenatal good experiences

All humans have an immense mental potential to be developed already during prenatal time. Many kinds of prenatal factors stimulate the brain and mind development in a positive way: daily talking to the fetus (with the hand on the belly), positive social environment, healthy and well developed mind of mother and father, constructive communication in the family, healthy food (especially mother), good mood in general, an attitude of 'welcome' towards the fetus (from mother and father), music, creative ambience, and love and care all round.

Fact is a huge majority of parents do not care for the development of their fetus/children's archetypal potentials. This is also proof that they do not care for the future of their children, which means in the end that they do not love their children. Creating a baby is in most cases an ego-centered compensatory cause.

### Postnatal good experiences

The economic, social and environmental conditions shape the foundation of the 22 mental functions during the first 5 years of the baby. During this time 80 % of the mental patterns are structured and dominant during the entire life.

#### Early positive mental shaping processes prepare for life:

❖ Peace, Justice, Balance, Hope	❖ Self- and Life Management
❖ Moral, Faith and Spirituality	❖ Managing Relationship, Family Life
❖ Care for Environment, Ecosystems	❖ Managing Personal Development
❖ Consumption, Needs and Wants	❖ Life Course of Working, Learning

Peace, happiness, love and any positive experiences stimulate the brain and mind development during postnatal time (e.g. music, wellbeing, learning stimulations and talking to the baby/infant). Supportive factors in the everyday life are:

☺ Secure economic status of the family	☺ Creative activities in the family
☺ Good education (kindergarten, school)	☺ Expressing interest in the child's emotional life
☺ Appropriate parental education	☺ Being truthful, reasonable and understanding
☺ Good communication in the family	☺ Being reliable in all matters that affect the child
☺ Reading to the child (fairy tales)	☺ Answering positively to the demand for attention
☺ Talking and listening to the child	☺ Psychically and spiritually healthy parental relationship
☺ Learning atmosphere in the family	☺ Parental caress / body touch promote brain development

The state of the mind of people is highly shaped (made) from their biography and from the previous generations. Most people of the previous generation did not and do not have well shaped and developed mental functions. But people can also inherit good experiences from the previous generations.

There are concepts and methods to become free from the burdens of the past. Early critical experiences can be cleaned out in the unconscious mind. Alternative positive patterns can be shaped in the unconscious mind.

## 2. Indelible Archetypal Principles

### The real meaning of the word 'religion' is widely unknown.

The word religion comes from the Latin: 'Re-Ligare' or 'Ligare', which means 'to bind' or 'to connect'; and 're-bind' or 're-connect'. But how can we and what for should we bind and connect or re-bind and re-connect?

There are principles in the world of physics and technology. To create technology and to deal with the physical world we must respect these principles.

There are also principles in the biological world. If we want to benefit from the biological nature, we must respect the principles of the biological worlds.

The development of the human body since prenatal time and during the entire life span is founded on certain biological principles. We must respect the principles of the body's development.

The development of the mental functions since prenatal time and during the entire life span is founded on certain learning processes. We must respect these principles of learning.

There are many spiritual values (non-physical) and in that sense spiritual principles. Such values are love, care, hope, justice, balance, etc., which have inherent principles we must respect.

There are human values, which are based on ethical principles. The history of philosophy, psychology and education has identified many precious human values we must respect.

There are society-oriented values, based on certain principles - for example about social, political, economic, educational and nature-oriented developments - we must respect.

**→ All these principles have archetypal character, which means they are genuine and eternally valid for humans, humanity, and human development forever.**

These principles refer to human development and human life. We call them 'Archetypes'. 'Archetypal' means: eternally and genuinely valid for all humans and all human development forever.

**Therefore, it makes sense and it is comprehensible to conclude:**

**→** We need to bind with the genuine archetypal principles that refer to human development, human mental functions and human life since prenatal time and during the entire life span.

**→** Humans have 22 mental functions that need to be shaped according to archetypal principles. One function is the Spirit that creates the dreams. We need to bind also with this source of life.

**→** We need to bind with the genuine archetypal principles that refer to genuine human values: love, care, hope, justice, balance, protection, truth, and many more are spiritual principles.

**→** We need to bind with the genuine archetypal principles that refer to governance, economy, public education, social systems, environment, and the exploitation of the world's resources.

If the world population collectively respects the genuine archetypal principles and implements the archetypal development, global peace, justice, protection, balance, human values and the truth will prevail and the already heavily damaged ecosystems can still function in the benefit of us. Wars and repression will be obsolete.

Isn't it the utmost interest of humans to create a world with peace, justice, protection, balance, human values, the truth and inner fulfillment? We can make the best of our mental potentials, rooted in the genuine human values.

**→ This is the 'Archetypal Religion' that is the only concept that structures the genuine path of human development. Therefore we need to connect (to bind) with all the archetypal principles.**

### **3. Mental Operations**

**Mental functions are like 'micro-chips' ('software' or 'archetypal code' or 'archetypal principles')**

- The 22 natural mental functions ('micro-chips') must be shaped and nurtured.
- Each mental function must be formed, shaped, developed and trained for its specific use.
- Each mental function has a quality, efficiency, and a meaning parameter.
- Underdeveloped and malformed or distorted functions have multiple critical effects.
- Mental functions are interrelated, influence each other and require multiple balances.
- Imbalance within and between mental functions lead to critical quality and effects.
- Effects of behavior are an expression of the quality and efficiency of the mental functions.

### The 22 mental functions

The right way of shaping the mental functions lies in the coding of the mental functions ('micro-chips' constructed in the brain mass), in the determined potentials of all the mental functions and their multiple interrelations.

1. The manifold operations of thinking	2. Identifying and dealing with 'inner needs'
3. Identifying and valuing meaning	4. Practical intelligence and artistic talents
5. Experiencing and dealing with emotions	6. Coded conscience structure
7. Forming ideals, attitudes, norms, faith	8. Dynamics of psychical energy
9. Reservoir of experiences (unconscious)	10. Unconscious projection dynamics
11. Spiritual intelligence (dreams)	12. Ability to love and to receive love
13. Visualization: Meditation, contemplation	14. The energy of libido, pleasure, drive
15. A multitude of learning capacities	16. Inner gender polarity (Animus-Anima)
17. Defense and integration mechanisms	18. The management functions of the "I"
19. Problem solving, dealing with criticalities	20. Will and decision making
21. The many kinds of perceptions	22. Building up knowledge (information)

\*) 22 mental functions: Depending on interpretation we can categorize in more or less functions.

### The shaped humans

- Each single mental function has a specific potential, designed already by biological constructions.
- A human grows and develops with incoming information from the many external and internal sources.
- People must become aware that most information from external realities is reduced, distorted or fabricated.
- People must learn the importance of the internal realities they perceive; they can learn to interpret them.
- Each behavior pattern of a person is the result of the ways the mental functions are shaped.

➔ **The mind develops through manifold learning processes: high all-sided learning = high development.**

### The 6 different highly relevant needs for human development

• The Needs for the Mind	• The Needs for Life Perspective
• The Needs for the Body	• The Needs for Behavior
• The Needs for Life (making a living)	• The Needs for Spirituality (= meaning)

### People have all-encompassing spiritual needs; 'spiritual' means: 'meaning oriented'

• Love for Life	• Happiness, Joy of Life
• Zest and Skills for Life and Work	• Holistic Fulfillment
• Self-Management Skills	• Growing towards Completeness
• Meaningful Self-Realization	• Interest in substantial Knowledge
• Realization of Talents (Potentials)	• Truth, Truthfulness, Genuineness

The use of the 'spiritual Intelligence' (the mental function that creates the dreams with messages) leads to fulfillment of the all-encompassing spiritual needs, which is the fundamental path of individual and global evolution.

**Nothing can be better in the human world than the quality of the shaped minds**

- Constructive behavior is rooted in the quality of the holistically shaped mental functions.
- Constructive faith is the result of positive external influences since prenatal time, and of holistic growth.
- A constructive lifestyle is the result of external influences since prenatal time, and from holistic growth.

**4. Evolutionary Life Philosophy**

**Evolutionary Philosophical Anthropology provides knowledge for:**

- A new understanding of humans and evolution
- An evolutionary development of humanity
- Becoming responsible for personal growth
- The best possible fulfillment of people
- The most advanced positive Life Philosophy

**The human creation**

- It is a unique gift to be a human, to be on earth, to make a living, and to grow lifelong.
- Humans go through very different and unique life periods starting as an embryo.
- The kinds of development are innumerable: biological, mental, spiritual, and behavioral.
- The manifoldness of experiences humans can make during their life on earth is amazing.

**Everything is like an organism**

- It's senseless to think the 'other world' is in an eternally static state.
- Progression is meaningful, beneficial; regression is decadent, suicidal.
- Evolution shapes and serves humans, is an intrinsic aim of human life.
- Humans without evolution remain archaic, static, mulish, and ill-developed.
- Humanity moves between the direction of regression and evolution.

**Everything is in endless development**

- The planet with its ecosystems is in an endless complex development.
- Societies are in an endless development, for progression or regression.
- All humans are in an endless development, regressive or progressive.
- The community of all souls is in an endless development, regressive or progressive.

**Practical life philosophy serves the human evolution**

The fundamental intrinsic aim of humans and humanity is the (archetypal) psychical-spiritual evolution. Human evolution serves the People to develop their mind and soul for spiritual qualities. Human evolution also serves the souls in the other world for redemption. Human evolution serves the people in the future, the unborn today, and the generations for centuries to come.

➔ **The present is the result of the past and the future is the result of the present and the past.**

**Some practical aims of 'Evolutionary Life Philosophy'**

- To live love, the genuine psychical needs, with truthfulness
- To acquire knowledge and skills to efficiently master life
- To understand the feelings and to be able to manage them
- To prepare the people for a fulfilling relationship and family life
- To live desire for the other gender, for sex, for love and trust
- To become free from unconscious biographical burdens
- To be able to solve difficulties, crises, problems, conflicts
- To care for health, nature, environment, and the planet

**Human values are determined by the human potentials; some special examples are:**

Self-consciousness. Hope. Fulfillment. Genuine life aims. Happiness about life. Satisfied sexuality. Pleasure and joy. Talents. Taking responsibility. Integrity. Morality. Love for the creation. Searching for the truth. Balanced judgment.

➔ **There is an urgent need to put humanity on the track of the Archetypal Human Evolution.**

Probably up to 95% of all babies and children on this planet are not cared from their parents and the social environment the ways the archetypal principles require. That's why we have the global mess and dire misery on earth, highly produced from governance, politicians, people in power and leader functions with a malformed mind and corrupted personality traits. This is the species called 'archaic human' with no or little relevant self-knowledge.

## **5. Religion: What for?**

There are two basic options to determine our existential position:

1. **We can think:** A human is created from the unification of a sperm and ovule, which together inherently constitutes the DNA. Nothing was before conception. And nothing is after death. There is no kind of after-world being and identity of a human.
2. **Or we can think:** Souls have an energetic, non biological body and live somewhere in the universe. We have no comprehensible idea about this 'other world'. It seems to be a somehow meaningful project that souls incarnate on earth through becoming a biological body. It does make sense to assume that a biological body is congruent to the energetic body. After a certain time the biological body dies and the energetic body goes back to an unknown place in the universe.

If there is a kind of 'human' life before and after the existence on earth, then the question arises: What for is the incarnation good for? No religion answers this question in a reasonable and comprehensible way together with the complex mental, spiritual and human development.

➔ **What for is a religion good if not for the all-encompassing genuine development of the mental functions as the fundamental meaning of life? Meaning transforms into ways of living.**

➔ **Archetypal Religion makes people self-responsible for their mental development latest with the age of young adulthood. It includes comprehensible critical learning. No Church needed!**

➔ **In contrast, all religions are highly disconnected from the genuine development of these 22 mental functions. Christians are forced to submission, obeisance, and psychotic 'belief'.**

To develop all these 22 mental functions, which starts already with prenatal influences, is the genuine (authentic) human path of inner development. Mental functions have an efficiency parameter and a 'spiritual' quality. The 'spiritual qualities' reflect genuine human values, which shapes itself the genuine 'Ethics'. This path is the genuine and primordial meaning of human life for everybody.

We can build up spiritual qualities, strengthen and live such qualities. The qualities we acquire are the only result of our human life on this planet we can take with us to the other world. And in the other word we get the place we deserve with the qualities we have accumulated. Human evolution is always about development between total regression and complete fulfillment.

This 'Archetypal Religion' is the only concept that structures the genuine individual and collective path of human development (evolution). It is valid for the entire world population, for everybody. And everybody and all cultures can decorate around the activities of archetypal personal development whatever they like or find valuable to learn and to practice.

→ *We also have the Archetypes that are energy producers for inner processes and for connecting with the eternal source of life. The source, the path and aims are expressed in the symbol 'Sun' and 'Circle-Cross-Mandala'.*

We call this path for archetypal personal development the 'INDIVIDUATION PROCESS', which leads to complete fulfillment. But you should not mix this term with Jungian' and other' authors. They all use this term in a strongly reduced and even disfigured way and with old-fashioned knowledge, which is mostly only a rewritten work. All their 'products' do not have the totality and necessary all-encompassing advanced concept that is needed to reach complete fulfillment, which only the concept of the 'Archetypal Religion' can offer.

Genuine human life is a lifelong process of learning and all-encompassing development. What we can take with us when we die is the acquired quality of our soul that we built up during life with the archetypal principles. We have the freedom to decide that we want to respect the archetypal principles of development.

**We also have the total freedom** to deform, pervert, manipulate, brainwash, weaken, extinguish, stifle and destroy the development of all mental functions of the people (except the Spirit) already during prenatal time and during the entire life span. We have the freedom to extinguish human evolution. That's what religion, governance, politics, economy, mass media and public educations practices all over the world for their own sake and insanity.

## 6. New Ways of Living

### A New Approach to a Sustainable, Successful, and Fulfilling Way of Living

- Fulfilling ways of living provides success, happiness and fulfillment
- For a fulfilling life with periodical learning and renewal
- For taking one's life and destiny into one's own hands and responsibility

### Methods and Lifestyle

- Self-knowledge is a way of living and developing; it comes through training, practicing the methods. Each performance demands increased training.
- Meditation is a spiritual method which goes hand in hand with a certain lifestyle that gives time and space for the reflected and controlled management of the external life and the inner life.
- Practicing meditation and dream interpretation (meaning-oriented) don't go far without the use of other well formed psychical (mental) functions.

### Basic Suggestions

- To relax systematically and shortly twice a day (10 minutes)
- To write down the dreams daily when they can remember a dream
- To practice daily a short imagination exercise on any current issue
- To empty the mind each evening with a short mental-exercise
- During weekends to regularly spend an hour reflecting on the past week
- To read an enriching and stimulating book for a few hours a week

### Live with your Mind

- Getting rid of inner suffering through analytical and contemplative elaboration
- Becoming free of conflicts clarifying them and with the right attitudes
- Living requires a clear mind; means: balanced and doing 'things' at the right moment
- Dealing with life in a combination of analytical, artistic and creative way
- Thinking in an integrated combination of rationality and spirituality

### Mental Functions for Ways of Living

- To make a living humans need well-formed psychical (mental) functions.
- Operational efficiency of the mind is an indispensable quality for success in life.
- Low efficiency of psychical functions leads to failure, critical results, and in the end to failure of life.
- To make a successful life, humans need to manage the quality of meaning (sense, values, importance).
- Low quality of meaning leads to failure, wrong results, and in the end to failure of life.

### **Self-Management in Everyday Life**

- A conscious and planned time organization is as important in private life as in the professional world.
- In the personal life (and not only at work) it is important to apply detailed planning to one's own goals.
- Creativity is essential for making a living. Individual problems can be solved more efficiently with creativity.
- To make a successful personal way of living, humans also need significant knowledge and skills.
- The ways of spending money fundamentally influences ways of managing life and happiness.

### **Health = Healthy Lifestyle**

- 'Health' includes the whole human being with his lifestyle and psychical-spiritual and social being.
- Mental fitness includes intuition, imagination and spiritual experiences (experiencing meaning).
- Lifestyle includes a genuine identity, inner authenticity, realization (to give expression) of inner talents
- Lifestyle includes ability to control instinct and drive-satisfaction, also ability for living love.

→ The principles of shaping the mental functions say: Behavior can never be better than the shaped mind. The state of humanity, the world and the planet with all the wars since 5000 years is proof enough.

→ Neither God nor Gods or Holy Men or Women can help us on this planet with supernatural interventions. Not even magic thinking can bring rain to the desert. The Prophets, Saints and other holy beings can't help either.

→ There is an immense power fight and mess between the many religions and beliefs. Its bloody history is at least 3,000 years old and hasn't changed much since then. That's because they ignore the archetypal principles.

## **7. New Relationship Man-Woman**

- The relationship between man and woman is a kind of being with high values and a unique possibility of living with a managed personal psychical-spiritual development.
- Finding the 'true self' and self-realization through a relationship is a particular challenge, because the patterns from childhood are repeated automatically by each adult.
- Two partners influence each other enormously in the development of their personality. The unconscious interplay is decisive for the superficially created ways of living together.
- Masculinity and femininity are products of continuous processes of development, which are decisively influenced and transmitted socially. There are many ways of living masculine and feminine principles.

### **Partnership-like relationship**

- ☑ Love in the partnership must be regularly stimulated and formed.
- ☑ Partnership regulates the common things by communication.
- ☑ The power-situation is balanced, and has to be worked at, daily.
- ☑ The partners don't possess each other with their whole being.
- ☑ The mutual dependence of sexual satisfaction is not against autonomy.
- ☑ Working out the unconscious life (the biography) is partly a shared activity.
- ☑ Partners orientate commonly on their dreams, intuitions and meditations.

### **Being a woman / Being a man**

- Man and woman: The psychical life as a wholeness 'functions' differently.
- Masculine and feminine roles are not merely a product of learning processes.
- Masculinity and femininity exist as a quality. That is linked psychically and physically.

- Man and woman must together bring in balance masculine and feminine principles

#### **Man and woman are naturally (substantially) different**

- The psychical life (mind) as a whole doesn't work the same with men and women.
- Femininity and masculinity are psychological and biological qualities.
- No man and no woman become 'completed' without the opposite gender.
- Man and woman have the psychical opposite gender as a polarity in their psyche.
- Creating a balanced 'male-female' wholeness is the essential characteristic of a marriage.

#### **Meaning of marriage**

'Marriage', in its core focuses archetypal inner processes; the meaning is 'archetypal-holy'; 'holy', because it is unimpeachable as an archetypal concept of the psyche (mind). Only through this aspect does 'marriage' as a ritual celebration and realization have full legitimacy.

➔ **The homosexual 'marriage' and the transgender concepts have got nothing in common with this.**

**The promise of Love: "I give my best for you and our life together; I guarantee from my mind and soul: ...."**

- 😊 to understand you in your verbal and non-verbal expressions
- 😊 to support you and not to abuse your weaknesses
- 😊 to constructively deal with disagreements, arguments, misunderstanding
- 😊 to be a 'strong shoulder' for you when you need it and to encourage and assist you
- 😊 to satisfy your needs and desires in a way you feel comfortable with
- 😊 to balance my interests with your interests and to respect the rules of partnership
- 😊 to respect your qualities, feelings, and also your emotional limits
- 😊 to care for you and your being (mind, soul, heart, desires, body, health)
- 😊 to promote your psychological and spiritual development
- 😊 to respect and integrate all your qualities as a complementary part
- 😊 to give highest priority to love and always to take care of this love

### **8. Meditation and Contemplation**

#### **Meditate in the appropriate manner**

Meditation is visualization and an aim-oriented operating with inner pictorial ideas. First always determine:

1. What do we want to achieve? Determination of aims. Reasoning.
2. With which images (symbols) do we want to work with? Determine instruments.
3. How do we actively create the visualization? Operations. Procedure.
4. How do we proceed with the interpretation? Interpretation.
5. How do we apply the result in daily life? Conclusions for life.

#### **Imagination**

- Imagination is the way of meditation (visualization) with the purpose to explore, to understand and to renew (form, shape) the complete psychical and real life.
- With imagination one can relax, find new strength, prepare solutions for problems, free the mind from thoughts, understand other people, find the meaning of life, explore dreams, discover reasons for suffering and difficulties, explore the subconscious and much more.

#### **Contemplation operates with archetypal symbols**

- Archetypes are related to general patterns of psychical forces, to processes of psychical transformation

- Archetypes reflect the fundamental life themes, the meaning and essential values, and the transcendental reality.
- Archetypes are for example: pyramid, Mandalas, sun, figures such as the old wise man (woman), and more.
- General symbols reflect the concrete basic themes of human existence, which concern all humans.
- General symbols are images from the world: house, car, birth, marriage, child, old man, dog, mother, father, etc.
- Symbols (images) can express the essential real life issues of everybody.
- Contemplation with Archetypes gives us a symbolical access to the “mystery” of mankind.

### **Examples to apply meditation**

- 1) Relaxation, balance and centering of energy
- 2) Self-strengthening, renewing the energies
- 3) Being conscious of one’s daily life style
- 4) To understand relationships
- 5) Developing solutions for new challenges
- 6) Clarifying difficulties and conflicts
- 7) Understanding psycho-somatic suffering
- 8) Getting rid of painful past experiences
- 9) Understanding dreams
- 10) Exploring all inner elements of the conscience
- 11) A conscious dealing with emotions (feelings)
- 12) Dealing with one’s own needs
- 13) Strengthening will and ego-control
- 14) Recognizing projections and identifications
- 15) Using intelligence consciously
- 16) Broadening the perception
- 17) Understanding the mystery of mankind
- 18) Recognizing the state of the earth from a spiritual point of view
- 19) Identifying and understanding one’s own destiny
- 20) Planning and realizing the path of Individuation.

### **9. Dreams and Spiritual Intelligence**

People have always given importance to dreams, although mostly with magic understanding. In the ancient world ‘big dreams’ have been considered as messages from God. Today, for most people dreams do not have any importance for their life. There are also a lot of people that do not give any importance in thinking. People think dreams are rubbish.

#### **Every human has dreams at night**

- Every person dreams 2-4 times during his sleep. It’s a human matter that many people can’t remember their dreams. Everybody can learn to remember dreams.
- Dreams are not the rubbish of the everyday life or the past, or a result occurring by accident and without meaning. Dreams are a useful psychical-spiritual function.
- Images or sceneries in dreams can have a subjective or objective meaning, a spiritual meaning, an eternal meaning, the meaning of a behavior or an attitude; and some dreams express ritual processes of transformation.

**The spiritual intelligence is a mental function (Spirit)**

- The spiritual intelligence is creating the dreams in order to guide humans.
- The spiritual intelligence is 'talking' to the dreamer through dreams.
- The spiritual intelligence operates in dreams aiming balance and development.
- The spiritual intelligence is the only source to understand Soul and God (with dreams, meditation).
- Humans can't manipulate dreams and can't manipulate the spiritual intelligence.
- Correct interpretation requires knowledge about mind, behavior, world, life, etc.

**Dreams tell the truth**

- Dreams tell the truth about: dreamer, people, religions, ideologies, society, the planet, the future and God.
- 90% of all psychologists, therapists and analysts know a mere 10% about dreams and dream interpretation.
- Most people interpret their dreams on an archaic (magic) level (superstitious) with primitive knowledge.
- We can't interpret dreams correctly without knowledge about the unconscious and the real life.
- We need to grow psychologically and spiritually to understand our dreams correctly.

**Dreams are the most valuable source of human existence**

- Dreams inform, counsel, warn, support, promote, heal, develop, evaluate, and shape the evolutionary path.
- Dreams are indispensable part of being human; shape the "*royal path*" to an entire psychical-spiritual universe.
- If this royal path is nurtured correctly, it enables to reach highest possible psychical-spiritual fulfillment.

**The spiritual challenge for the archetypal human evolution**

- We can manipulate and deform any mental function, any behavior, any individual, and any concept or knowledge. But we can never manipulate or deform the spiritual intelligence.
- The Spirit is not a human creation, not a product of culture, but a spiritual-psychical function in each psyche (soul, mind) of each human. The Spirit is the highest authority of human evolution

**The spiritual challenge for religions and concepts of spirituality**

- Religion without the spiritual intelligence, without dreams and the Archetypes of the Soul is archaic and useless, a fabrication, and destroys humanity and the archetypal human evolution.
- The inner Spirit (the spiritual intelligence) is the highest authority and stands above all religions and concepts of governance, above all dogmatic and ideological teaching!

**Dreams determine human evolution**

Dreams also must be integrated in life coaching, spiritual teaching, psycho-analytical theories and practices, and in philosophical thinking about the human being and human existence, and in real life and personal development.

*In the future, the new breed of leaders will integrate and use the spiritual intelligence in order to solve the global mess and to bring humanity on the track of the archetypal human evolution.*

**10. Spirituality and Meaning**

To be human and to grow as a human is immanently spiritual.

**Psychical-spiritual development**

- The word 'spiritual' refers to meaning and human values, human qualities, qualities of the soul and of life.
- Soul, mind, transcendental roots and terrestrial life can't be separated without losing psychical-spiritual growth.

- Genuine human values and inner needs are spiritual
- The ability to love is a spiritual function
- The meaning of all human interactions is spiritual
- Searching for the meaning of life is spiritual
- To forgive, reconcile, learn, and renew is spiritual
- Joy of life and genuine happiness are spiritual
- Peace has an inherent spiritual meaning
- Fulfillment in life is a spiritual aim of human's life
- Love between a man and woman is especially spiritual
- Marriage has a deep spiritual and archetypal meaning
- Inner archetypal processes are spiritual and psychological
- Catharsis of the unconscious mind is a spiritual process
- Creating balance between the different mental systems is spiritual
- Growing towards wholeness is a psychological and a spiritual process
- Spiritual qualities require quality and efficiency of all psychical functions

#### **Psychical-spiritual development**

- The word 'spiritual' refers to meaning and human values, human qualities, qualities of the soul, and includes a connection to the other world.
- The 'mission' that every person (soul) immanently has, is to become higher 'qualities', means to become 'complete' through a terrestrial life.
- It becomes obvious that soul, mind, transcendental roots and terrestrial life can't be separated without losing the psychical-spiritual development.
- The psychical-spiritual development is the fundamental challenge to become 'round', complete and fulfilled as a human and a soul. There is no other way!

#### **The Circle-Cross Life Symbol has an intrinsic spiritual meaning**

Becoming and being a human, aim of human life, love, joy, zest for life, happiness, hope, justice, peace, power of the inner Spirit, totality, completeness, balance, openness, and psychical-spiritual evolution aiming fulfillment. The crucifix contains the opposite values: pure frightening darkness. Human Evolution is based on archetypal life symbols.

#### **The Life Symbol: Genuine Source of Life**

Intrinsic meaning: Human being, life, love, joy, zest for life, lust, full of life, satisfaction, happiness, hope, justice, peace, power of the inner Spirit, centered in the inner Spirit, all-embracing life, totality, completeness, balance, openness, light, confidence, aim, psychical-spiritual evolution, fulfillment, conjunction of the real and spiritual world, fulfillment of the Archetypes of the Soul, source of life, catharsis, renewal, reconciliation, forgiveness, salvation, redemption, and presence of God.

Spirituality is the innermost stream of values which characterize the genuine human evolution as a transcendental-terrestrial project. With this new understanding, spirituality must become an indispensable innermost stream of politics, economy, public and academic education, and religion for the future of humanity and the future ways of living. This is an archetypal order and the fundamental principle of the genuine human evolution.

#### **11. Evolutionary Education**

- Education about psychical-spiritual development is fundamental for the youth and for all adults, including about new ways of living and understanding of mankind and human life.

- New spiritual education is also required for all people in responsible positions in politics, media, economy, industry, education, and religion.

#### **Importance of new education**

- Highest importance as education is the fundamental preparation for success in life, work, and renewal in a very fast changing world. Pioneering vocational education is fundamental.
- The immense problems of humanity and the planet can't be solved without fundamental renewal of education and especially a fundamental revision and re-construction of economics.
- Constructive behavior in life, in social life, in political participation, in the world of work and business must become subjects and topics of science.
- Holistic and permanent all-embracing psychical-spiritual development aiming for inner satisfaction and fulfillment must become subjects and topics of science.
- Inner rooted spirituality, moral integrity, meaning of life, respect for humanity, nature, animals and the protection of the planet and its ecosystems.

#### **New mission of public education**

- Public Education must be founded on a new understanding of mankind and human life.
- Public Education must consider a holistic forming of all mental functions.
- Public Education must focus on the inner psychical-spiritual process.
- Public Education must teach that 'meaning' is intrinsically part of being a human.
- Public Education must prepare people for resolving problems and conflicts.
- Public Education must provide the knowledge of money-, self- and time-management.
- Public Education must shape the genuine human values and its practical capacities.
- Public Education must promote critical and creative or pioneering thinking.
- Public Education must teach extensively the manifold capacities of the power of love.
- Public Education must integrate the potentials of the spiritual intelligence (dreams, meditation).

#### **Global need for new education**

- Billions of people need knowledge, skills or methods to understand themselves and their life, their difficulties, their problems and conflicts.
- Billions of people must be protected from brainwashing, manipulation, evil seductions, false games, and the perverse and neurotic collective theater.
- Billions of people must be enabled to live love and to be loved, to find happiness and satisfaction, to create success and a secure life environment.

#### **Self-knowledge is fundamental in Public Education (all levels)**

*Self-knowledge is the call for all humans to be and to become a genuine human - a mission also of public education.*

- Self-knowledge forms qualification for personal and professional life.
- Self-knowledge establishes competences for relationships and life.
- Self-knowledge reduces life risks and suffering over the life course.
- Self-knowledge creates inner security and trust in one's own forces.
- Self-knowledge forms an all-sided balanced person (personality).

*Private (public) education including social sciences, schools of business and economics, must be 100% free from accreditation requirements. This is an absolute must in order to find collectively back the archetypal human evolution.*

➔ **Accreditation paralyzes human development, evolution and renewal of society.**

## 12. Archetypal Personal Development

Each holistic psychical-spiritual development, we call it 'Individuation' or 'Individuation Process', aims to become a 'fulfilled human'.

### Archetypes of the Soul

- Archetypes are symbols that help in finding orientation during the process of Individuation.
- Archetypes stimulate forces, growth and development; above all the truth of human evolution.
- Archetypes order and place psychical functions into new structures and new interconnections.
- Archetypes give orientation for humanity, religion, spirituality, politics, economy, and education.
- Archetypes are eternally valid meaning about human being, meaning of life, and fulfillment.
- Archetypes can never be extinguished, are 'holy', 'untouchable', and valid for all humans forever.

**Growing continuously and evolutionarily, psychologically and spiritually, is called 'Individuation':**

- Archetypes give measures (standards) in quality and quantity, embedded in human life.
- Archetypes are like laws and norms or 'milestones' for the psychical-spiritual development.
- Archetypes call for personal development and competences for living (knowledge, skills).
- Archetypes reflect transcendental realities in the psyche and realities in the other world.
- Archetypes are the very old images of a transcendental reality, the eternal valid orientation.
- Archetypes of the Soul are also energetic 'transformers' (e.g. to experience in dreams).

### Archetypes for true religion, spirituality, politics, economy, industry, and education

*There are since millenniums supreme Archetypes of the Soul which are related to high professional 'missions'. Such eternally infallible symbols are also today valid, obviously with modern knowledge and frame of life. They express the spiritual preparations for power and destination of a spiritual king, a prophet, a religious leader, and of political or economic leadership (head of states, ministers, and CEOs).*

*Humanity needs a new breed of leaders having processed such supreme Archetypes.*

### 13. The Schellhammer Archetypal Pyramid

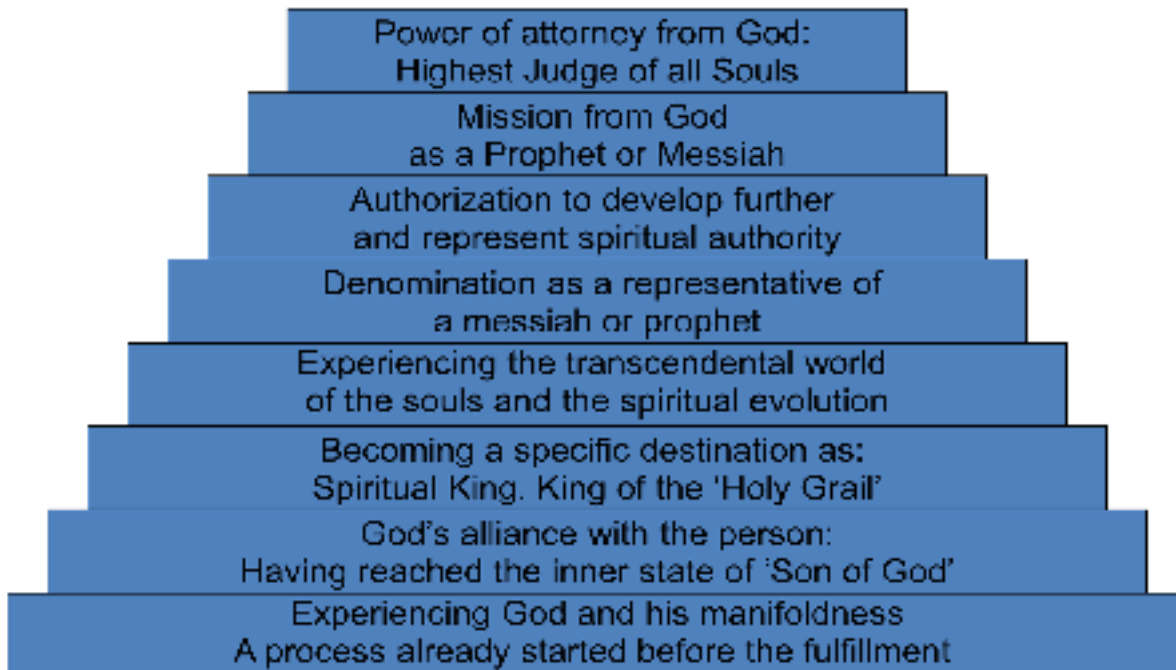

#### Basic Needs for the Lifespan of ALL Humans:

Healthy Food, Water, Air, Environment, Shelter, Security, Protection, Care, Health Care Learning, Work, Money for Living, Responsibility, Education, Inner Development, Justice, Peace, Ethics, Hope, Love, Truth, Knowledge, Human Values, Meaning, Sexuality, Genuine Spirituality, Evolving Capacities

#### 14-A. The Supreme Spiritual Authority

It's a very long way to go! Guided from the Inner Spirit:

#### 14-B. The Supreme Leadership Authority

The new leadership to manage the world community with 8 billion and up to 12 billion people

→ A new concept of leadership with an all-round preparation of leaders is indispensable.

History and the state of humanity, the world, and the planet today show us: All kinds of higher leadership have been a disastrous failure today with unstoppable accumulation of destructive effects and consequences for centuries.

- Leadership is not simply about a set of advanced knowledge, practical skills, and personality strength.
- Leadership requires responsibility for the society of a country as a nation is the 'home' of its citizens.
- Leadership requires responsibility for the world population, the future of the people and the planet.
- Leadership in the world today and tomorrow is a mission on a level as high as a spiritual authority.

Future leaders in the world of politics, governance, economy, banking, culture, and public education must be prepared with very demanding and challenging inner processes similar to the processes of a 'King of the Grail'.

There are different levels and directions of preparation; here some examples:

- ☐ To go through the processes of Individuation up to complete fulfillment
- ☐ To learn from all the failures from the past in all systems of societies
- ☐ To adapt a complete new understanding of mankind and human development
- ☐ To learn about the epigenetic mental inheritances and how to take measures
- ☐ To learn a lot about all destructive processes around the globe (e.g. 'deicide')
- ☐ To work for highest freedom and self-determination of countries and provinces
- ☐ To learn how to use meditation and dream interpretation for decisions
- ☐ To explore and prepare a new public education for development and living

- ☐ To adapt new ways of interrelated communication and understanding
- ☐ To understand the responsibilities as a mission for humanity and its future
- ☐ To identify all anti-evolutionary factors and to implement dynamic alternatives

## **15. Constitution of Archetypal Human Evolution**

### **1. GOD IS EVERYTHING**

God is the fountainhead of all life. God is also Spirit. Each human soul is created from this fountainhead and lives in eternal development. Value, promote and form being a human and the all-sided balanced human life; live and grow from your inner being with the inner Spirit (spiritual intelligence) and with love. You shall not abuse God or the Spirit for egoistic and compensatory purposes, or greed for power, self-enhancement, exploitation of humans and the planet. Nobody is entitled to ban or condemn humans in the name of God. Jurisdiction in the spiritual world is solely and exclusively reserved for a true Messiah and the spiritual kings in the world of the souls.

### **2. YOUR LIFE AND AIM**

Regularly take enough time to contemplate about you, your life, your fellow human beings, humanity and the planet. The highest aim in your life is to aspire and to live your all-sided balanced completeness in the evolutionary development. A human is a human through his psychical-spiritual organism. Herein lies begin and aim of the human evolution.

### **3. ARCHETYPES OF HUMAN DEVELOPMENT**

Humans need to bind with the genuine archetypal principles that refer to human development, human mental functions and human life since prenatal time and during the entire life span. Humans have many mental functions that need to be shaped according to archetypal principles. One function is the Spirit that creates the dreams. Humans also need to bind with this divine source of life. Humans need to bind with the genuine archetypal principles that refer to genuine human values: love, care, hope, justice, balance, protection, truth, and many more are spiritual principles. Humans need to bind with the genuine archetypal principles that refer to governance, economy, public education, social systems, environment, and the exploitation of the world's resources. ***Archetypes are also energy producers for inner processes and for connecting with the eternal source of life. The source, the path and aims are expressed in the symbol 'Sun' and 'Circle-Cross-Mandala'.***

### **4. MARRIAGE AND FAMILY**

The marriage between man and woman is an untouchable archetype and shall not be abused. Dignify being father and being mother as a high value of being and living. To educate a child is a demanding responsibility that requires education, and has to be embedded in the polarity of man and woman as a couple, or in individual cases as a friendship like community.

### **5. VIOLENCE AND PUNISHMENT**

You shall not be violent against humans or kill humans. A state has never got the right to kill a human as punishment (or for political interests) or to violate humans physically or psychically; not even in the frame of a persecution or investigation. You also shall not provoke other humans in such a way or put them in a desperate situation so that they become violent or murders.

### **6. LOVE AND SEXUALITY**

Live your genuine physical and psychical needs in a balanced and healthy way. Do not act against love or the inner Spirit. You shall not devalue the natural sexual needs, nor suppress them, nor live them in a perverted way. Live your sexuality with your opposite gender partner in a human way and with love. Do not create a baby if you are not prepared and not mature for the responsibilities and the consequences, educationally and financially.

### **7. PROPERTY RIGHT AND POWER**

Do not exploit (abuse) humans and institutions. You shall not take away from other people or from institutions or from other countries what is their right to possess. Humans, economy and states do not have the right to exhaustively exploit resources. No human, no institution and no government shall have enough power to create a national or global imbalance. Jurisdiction requires fairness, transparency, balance, justice, free from feudalistic spirit.

#### **8. AUTHENTICITY AND RESPONSIBILITY**

Acknowledge yourself and love yourself. From this state love the human being. You shall not make a wrong image of yourself. You shall not ignore, suppress or displace the realities with the purpose of gaining advantage or damaging humans or institutions. You shall not cheat others. You shall never abuse political, economic, educational, and religious or media power.

#### **9. SOCIAL STRUCTURE**

Society, states and humanity shall be created and developed in the attitudes of love (respect) and rooted in the inner Spirit, in a way that each human can realize his psychical-spiritual (mental) potentials and grow in a protected life frame. It is an absolute imperative from God that society and humanity shall not be militarized. Certainly, it is a long way to go until the world community has highly disarmed and developed alternative defense and security measures that make wars obsolete.

#### **10. EARTH AND ITS NATURE**

Protect with your way of living the nature, the richness of the earth and its resources in the interest of the community of humans and the genuine human needs – also for the future generations. In the interest of the conservation of the earth and of human evolution, all folks shall live with highest regard for the psychical-spiritual values and the vivid Archetypes of the Soul.

#### **All Solutions Require Education**

There are countless scientists and institutions that strongly warn all: A very dark millennium is looming. Human evolution is at stake! The total collapse could occur within 10-20 years.

People have to clean up the mess themselves! There are less than 4-5 years left to implement first strong changes. What happens today, will affect humanity in 5, 10 or more years.

It will take 25 years to establish the genuine (archetypal) path of human evolution.

I came to earth 2,000 years ago and again in the 12<sup>th</sup> century in Spain. Both divine missions failed terribly. Now, I was ordered to come back again. I didn't like it at all.

***I have all power of attorney from God as the highest judge of all souls on this planet and in the other world.***

People must change or the destruction of human evolution will occur. You want peace, justice, balance and hope; then you must make it! People must change and renew for their evolution.

If the governments, religions, and mass media hinder me to do my job, and if they do not support my pioneering divine project, I will send these souls into a dark place, far from God and his light for up to 50,000 years.

Leaders in all systems of society must manage changes and renewal towards archetypal human evolution. If they reject to do so, their soul must expect to get up to 30,000 years of being far from God and his light.

The all-powerful string-pullers behind the curtains will get up to 100,000 years 'dark hole' if they do not immediately change their Deicide program into collective archetypal human evolution.

If human evolution will be entirely destroyed, I will send all souls into a dark place, far from God and his light for 200,000 years.

I can guide you. I can give you absolution for the entire evil past and present. But this must be based on sustainable results of actions. Human evolution must be established with the 'Archetypes of the Soul'.

**As a measure of discipline I have closed the door to Paradise for all souls - with some exceptions - until the complete enlightenment of the truth is achieved globally.**

***The Schellhammer Institute provides you with the indispensable knowledge, education, advice and guidance.***

***The Schellhammer Retreat Center provides you with the indispensable knowledge for Catharsis and Renewal.***

***The young get the most advanced preparation with a Bachelor or Master program at Schellhammer Business School.***

**Document of Highest Archetypal Processes of the Soul**

(Extract from Dr. Edward Schellhammer, "The Manifesto")

Dream: *"Find the mystery of mankind!"*, somebody invites me.

Dream: An owl is guiding me.

Dream: Out of my abdomen a little tree grows.

Dream: I receive a sword, a sceptre, a globe and a cross; these symbols I compose into a circle-cross-Mandala.

Dream: I am in various churches, in ecclesiastical libraries looking for the truth. What I find is a lot of dust and stones.

Dream: I experience a ritual: *"God nourishes you, God strengthens you, God protects you, and God guides you."*

Dream: I go to the Valley of the Kings with seven white elephants.

Dream: I receive a goblet and I am summoned to search the mysteries of life in it.

Dream: I'm able to draw the sword of the king of the Grail from the rock and then I'm given an orb.

Dream: The ruler of the collective unconscious world of souls points his finger at me and shouts: *"This is the new Messiah!"*

Dream: I'm unified with this light; I am one with this sun. *"This is the unio mystica"* I hear said.

Dream: Preparations for a celebration "accomplishment of the Individuation process" is made.

Dream: Within me is the temple of the Holy Grail. Actually I know everything.

Dream: A voice: *"He, the Individuated man, has a particular assignment in this world, only thought (made) for him. Only he is worthy for it since he is the man of God, the third in the covenant with God and the Spirit."*

Dream: *"You know how life grows. You are life. You are being. You only do what you are. You come from the source in God. You understand the primal source of life. The people want bread from you"*, somebody says.

Dream: I've reached the goal. I've got the water and the fire and I know the path and the goal.

Dream: *"You know that God does not go to man, man has to seek God. God is life, wisdom and love. God is within you; you are in God. The signet ring is guaranteed to you. You are the king. You are the trustee of a concern which is not of this world. The new man is born."*

Dream: Through the fog I see the future. More and more people get ill and die.

Dream: The president of the USA has allowed me to tell him one of my dreams in front of the plenary assembly, and so I speak: "I saw a king coming to Europe, as pure and clear as none before. And I saw that all the nations disarmed; and I saw, how the king brought peace to all people on earth, the peace from God." Suddenly I realize I am talking about myself.

Dream: The Spirit says: “You are appointed and ready: The Messiah is great and alive. You have got the proper equipment to face the world.”

Dream: I experience, that I have passed all the ordeals (trials) in the union with God.

Dream: The inner Spirit speaks to me: “You represent God on earth. Nobody else! You have got all the powers of attorney. Make use of them. You are a true king of the Holy Grail. The world of souls is your kingdom. God loves you very much.”

Dream: One of a group of spectators shouts out repeatedly: “This is truly the reincarnated Messiah, have mercy upon us.” Then all of them pray this in a chorus.

Dream: The evil, a figure of horror, approaches me and says: “And you’re playing the second leading part.”

Dream: I receive ‘cosmic scissors’ and with them I cannot only cut and separate, but also join together and create wholeness.

Dream: I receive a new signet ring with twelve gemstones. “This is the ring of the Messiah” it is said.

Dream: I am wearing the signet ring: “No one dares to wear this ring and the last one who did, was living 2000 years ago.”

Dream: Those, who perpetrate atrocities against the values of love and the Spirit, are severely punished in the spiritual world.

Dream: A king has got two pharaoh birds, very colourful and marvellously beautiful. It is said that these are magic birds. We come to the city of Jerusalem. I’m very glad we’ve finally reached the goal together with the kingly birds.

Dream: The Reincarnated Christ has got a unique relationship with the sun: He carries it on his hands, but it is also within him, he calls it and gives it to the people whenever they want it.

Dream: The punishment is pronounced and sealed. Only the reincarnated Messiah can annul it. No folk can ignore his Messiah without the gravest consequences for the collective.

Dream: I am in the Vatican, in an immense arch room, full of all kinds of junk. There is absolutely nothing here that could have a value or could be vivid.

Dream: The whole project is finished. Everything is ready; I and my matters; for the whole humanity.

Dream: I walk through the Vatican. And I ask myself who has paid and still pays for all this, and under which conditions has all this been built. Hidden behind all of this is an immeasurable megalomania, a perverse suppression and exploitation.

Dream: A voice is speaking: “You are the new Messiah of humanity, and the guarantee for a good future.”

Dream: I tell people: “Never again will I come back to this earth. I am only here for a visit and I have to accomplish a job. And you have to get your shit together yourself.”

Dream: I tell the press: “You haven’t got the slightest clue about what kind of punishment is waiting for you for having ignored me and having kept me from the people!”

Dream: “I have not come from millions of light years away to this earth, sent from God, to play here the cretin and idiot.

Dream (2008): I told people in a dream: “You have 10 years left to take strong measures to avoid the total collapse.” But nobody listen. (That means in 2011: You have got 7 years left!)

Dream (2010): In 35-40 years everything will be over, the end, no more earth and no more humanity.

Dream (2015): The end of human evolution could be already in 20 years.

**Therefore, with all the power of attorney from my spiritual (archetypal) authority I decide today:**

Year 2014: I have closed the door to the paradise. I will not let a single soul into Paradise, apart from a few exceptions, until the evil octopus on this planet is detected and disclosed, until the truth is researched and clarified and until both are fully understood by the entire humanity. Everyone is summoned to work on this catharsis and renewal: Researchers, experts, scientists, journalists, politicians, legal professionals, CEOs, and all kinds of power holders and religious officials; but also all humans being in a state to contribute in any ways to this catharsis and renewal.

Every single person must be educated with the path that leads towards the fulfillment of the Archetypes of the Soul: the all-encompassing catharsis and the psychical-spiritual educational process, guided by the inner Spirit and the power of love. The day, one billion adults work on this process, I will re-open for these people the door to Paradise.

**You must want to know, acquire a lot of relevant knowledge, contemplate the knowledge, deal critically with knowledge, put the knowledge in a big (global) frame of interrelations, and this knowledge must result in action!**
