

## A Patchwork of Collective Failure

193 Member States are represented in the UN to work together on a wide array of global criticalities such as development, peace, security, and more. But there is still no peace on earth. The world is in a terrible mess and it gets worse every year. There is outrageous failure everywhere.

### Collective Failure:

- ☹ **2.2-2.4 billion Christians failed.**
- ☹ **1.5-1.8 billion Muslims failed.**
- ☹ **Other religions also failed.**
- ☹ **All kind of spiritual teaching failed.**
- ☹ **Over one billion atheists failed.**
- ☹ **Millions of politicians failed.**
- ☹ **Millions of economists failed.**
- ☹ **Millions of public schools failed.**
- ☹ **Most academic education failed.**
- ☹ **Millions of media outlets failed.**
- ☹ **Millions of CEOs and managers failed.**
- ☹ **More than a billion parents failed.**
- ☹ **All systems are affected from the insane deicide-virus!**

But thousands of universities, business schools and schools on economics offer their 'accredited' programs with slogans such as "We prepare the future leaders", "Our advanced leadership program", "We have triple accreditation", and so on. Accredited what for?

It doesn't mean anything except "We control everything, especially what you are allowed to know and how you are allowed to think avoiding critical questions."

They teach preponderantly the knowledge from the past, but have not learned from the history. They all 'sell' wastepaper, the ones for 1000-4000€ per year, the others up to \$80.000 per year.

Students and their parents are addicted from the label 'accreditation', but the word 'accreditation' is a kind of heroin or cocaine - similar to the indoctrination of the dogmas of religions. It's a kind of brainwashing!

### 60 Statements about Global Failure

1. It's a basket case that the 'Reincarnated Christ' without being a recognized authority, without terrestrial power, without celebrity status, without billions of dollars, without the ability to make miracles and without any official duty tells humanity about the 'Archetypal Religion' and the 'State of Humanity and the World', all of highest importance and urgency.
2. But it's your responsibility, you all the members of the UN Assembly have to learn and to take all necessary measures to save humanity from the fatal disaster in 10-20-30 years! The message is clear: Humanity is about to destroy the planet and human evolution.
3. You can think whatever you want. But does not the entire humanity have a serious mental problem? Who not? The collective mental degeneration and spiritual aberration is visible everywhere as a mega problem. Collective stupidity and blindness unfortunately can't recognize itself.
4. The following explorations about the state of humanity and the world is not about painting a black picture or constructing a mad exaggeration. To report about the big threats of humanity is not 'negative'.

Negative and alarming are certain global facts and the collective deformed psyches; and not what I report here. The true face of humans is very dark.

5. The big problem of humanity is that most humans don't want to know anything. They don't want the truth, especially not about themselves. They want delusions. They want their 'savior' and 'Führer'. But these leaders are themselves blindly imprisoned in lack of knowledge or in wrong or fake knowledge.

6. Most people don't want to learn anything. They are lazy-minded, conceited, greedy, naïve, narcissistic, dependent, trusting in authorities, submissive and brainwashed. This is the result of forming processes since prenatal time. Everything is based on the quality of the shaping processes of the mental functions.

7. Most humans want to be lied to, to be dominated, to be exploited, to be seduced and misled. They don't want to take responsibility about their life, the society and the planet. They scoff, despise, and condemn with their blindness all those who search for the truth.

8. One can shove the abyss right under people's nose, but not even then they would want to search for the truth. They simply don't want to know. Sad is that they all are highly robots. They all are brainwashed with inherited century (even millennium) old mental and emotional patterns.

9. It is visible and can be observed that humans have learnt nothing from all the wars since 1912. The Second World War was really bleak, diabolic and contemptuous. "Never again war!" they all said. But since 1945 new wars arose and never ended until today. 15,000 wars since 3,000 years and people learn nothing.

10. Many millions have been killed in these wars since 1945, have become handicapped, have lost beloved ones and their existence, and have been destroyed in their soul. These wars have destroyed all human values, infrastructures, resources and the nature and environment of entire countries and folks.

11. The entire Western World has become big, strong and powerful only through wars, genocide, robbery, destruction, exploitation, subjugation, enslavement and atrocities. Who are really the most terrible murders and criminals on this planet? Who obeys them blindly?

12. To mention is also the complicity of the religions. Christianity for example has killed during its history an estimated one billion people – for profit and power, greed and perversions, driven by delusions of grandeur and spiritual-mental deformations. The state of the world today shows us: Religions have terribly failed!

13. Today we have the mega corporations which seize since decades increasingly and today totally everything, exploit everything, destroy everything and cause unbelievable devastations on states, infrastructures, humans, economy and especially on nature and environment – for profit.

14. The Second World War has created 60 million deaths and immeasurable destruction. How many deaths have been caused through wars, killing, exploitation and poverty since 1945? This is human-made, caused by mental mal-formation! And the Third World War is daily only minutes away.

15. Today 6 million children die every year. Since 1945 up to today over 500 million died. Many more children died if we calculate up to the age 25. Up to one billion? The insanity is: Wars, hunger, famine, poverty, contamination, corruption, exploitation, colonialism, and globalization for Western prosperity and insane world power.

16. Through traffic accidents and contamination an estimated 60 million people died since 1945. We can add all victims, of famine and misery since 1945. With that the 60 million victims of the WW2 show us a new perspective about what is the really bad (evil, mad) and archaic face of humans (seen as a collective).

17. Total state debt 2017: \$65 trillion. Consumer debt: \$12 trillion. World debt: \$152 trillion. During 200 and more years people must live under the debt yoke. Not included in the calculation is that the global clock of debt continues to tick until the total collapse. Who will pay for these insane 'mistakes'?

18.The collateral damages through globalization amounts to \$3-5 trillion per year. The costs of damages through climate change amounts to another \$3-5 trillion per year. The ecosystems are already irreparably damaged. This also amounts to another \$3-5 trillion per year; ignoring here the human's suffering.

19.Since 20 years we can observe globally that all genuine human values are eroded and destroyed. The inner human development is practically extinguished in favor of excessive consumption, crazy fun and neo-colonialist politics. Those who search will discover the roots: Behind all of this is a plan!

20.Mass media worldwide determines how the humans have to be programmed since prenatal time: a mixture of truth, entertainment, disfiguration, falsifications and omissions, patterns of opinions (attitudes), illusions (delusions), stupefaction and dehumanization. Who are the owners?

21.World population in the year 1950: 2.5bn; 1970: 3.7bn; 2000: 6bn; end of 2017: 7.6-7.8 bn. In 15-18 years we will have an estimated 9bn people living on this planet; and in the year 2050 the world population will be around 10bn. Until the end of the century statistics calculate up to 12bn people.

22.Sewage and waste, plastic of all kinds, fine dust of all kinds from humans and animals, from the industry; the nuclear materials, the pharmaceutical and chemical products and the remains of wars (materials), also on the bottom of the oceans and seas, will totally contaminate all ecosystems and with that humans and species.

23.Within 30 years 10 billion people will want goods and services such as those available today in Europe and the US. But already today 5 billion people do not have the necessary goods, infrastructures and services for a dignified and evolutionary life. In 20 years poverty will hit up to 90% of the world population.

24.In 20-50 years gradually: all ecosystems destroyed, devastations, glaciers melted, high increase of sea level, beaches and islands lost, urbanizations at shorelines destroyed. Melting of permafrost will release mega-tons of carbon dioxide and other gases as well as ten thousands of millennium old different viruses.

25.Economic growth has a price: all resources exploited, immeasurable destruction, contaminated arable land, 40-60% lack of drinking water (much of it contaminated), everything contaminated, also humans; 50-60% of species eliminated, all food chains destroyed, endless violence and wars, 2-3bn people will migrate.

26.Politics (governance) is preponderantly arrogant, corrupt, pretentious, and spiritless; since millenniums. Narcissism, psychopathy, megalomania and thirst for power were and still are the eternal motives. The madness to possess and to exploit all vivid and non-vivid things is the eternally repeated drama.

27.Wealth distribution: 8 individuals dispose of the same amount of wealth as the poorest 3.6 billion people (2017). One percent of the world population disposes of the same amount of wealth as the remaining 99% of the world population. 8 individuals possess a wealth of \$430 billion. The poorest people of the world population (3.8 billion) possess \$410 billion.

28.There are people that are addicted to the technological madness. They think that technology will solve all problems. For example, statistics tell us that every year around 100,000 cars will be produced. This will have multiple critical consequences. The causes are human-made and it will destroy humankind.

29.Words such as man, woman, girl, boy, father, and mother are increasingly abolished. Man becomes woman and woman becomes man, free of choice. But the sexual gender genetically can't be changed. 'Marriage' is an Archetype (man-woman); also abused. Transgender bender is a scam. There is no gay gene.

30.A wrong idea about 'multi-cultural', 'tolerance', 'freedom' and 'emancipation' operates like pestilence; has already decomposed the human being. Behavior is to a large extent the result of what is programmed in the mental structures through tradition, education, environment, lies and propaganda.

31.Public education does not prepare the youth for the life and the challenges they will experience in the future. Each country programs its folk with (public) education, religion and ideology. The global disaster is rooted in the failure of education and religion.

32.Accreditation of public schools and universities with focus on business, economics, politics, tourism, psychology, social sciences ('Humanities'), art, literature, history, ethics, leadership and more is dictatorial, ideological, inefficient, fraudulent and exploitative.

33.The history that is taught to pupils at schools and brought to the people via the (mass) media is entirely disfigured, in the core not the truth. History repeats itself because people do not learn anything from it. Religion contributes with fabrications, deformations and psychotic teaching and practices. All they do is lie to billions of people.

34.Most people do not have any interest in knowledge about the future. But those who will live longer than 10-20 years, especially the youth today and the new-born tomorrow, also those who will be born in the near future, will experience a horrendous development of global decay.

35.Most people create a baby because they themselves wish to have a 'good' family they didn't have in their past. If they would love their children they would show commitment in the future perspectives of their children, a future with healthy ecosystems, healthy economy and a world without wars.

36.All this and much more facts makes clear that religion, spirituality, education, politics (governance), economy and behavior worldwide have lost the archetypal path of the human psychical and spiritual development. But without this inner path there will never be a solution, only a labyrinth without exit.

37.There are many more big threats to humanity that could be mentioned here. But the given picture sufficiently allows acknowledging that the entire humanity can't continue this madness with 'business as usual' without dramatic consequences. But humanity is imprisoned in a treadmill and madhouse.

38.Never will the mighty leaders on the political, economic and religious stage give up their power. Never will the mighty rulers 'behind the curtains' give up their almightiness. Never will the people give up their stupidity, ignorance, lazy-mindedness, greed, narcissism and servility.

39.Most humans do not develop (grow) beyond their adolescence to become an adult. Signs are: lies, lack of respect, no interest in knowledge and responsibility, blind trust, no critical thinking, abuse of all kinds, infantilism, and strong simplifications. The mass media condition this mental state in the collective.

40.Since World War II up to today 2017 an estimated one billion children and adolescents died. Human made causes: Hunger, Diarrhea, Diseases, Infections, Absolute Poverty, Low Health Care, Low Education, No Sanitation, Colonization, Exploitation, Corruption, Slavery, Child Work, Atrocities, Wars, Ethnic Cleansing, Criminal Governance, Religions and Ideologies.

41.Since 1900 up to today 2017 an estimated 250 million people died through 60 wars, ethnic cleansing and collective violence. If we add the later victims, the orphans, widows and the existentially ruined people, the figure of victims increases up to 500-650 millions. Costs of wars: over \$10.000 billion. The value of damaged infrastructure, goods and economy during 117 years of wars must be added.

42.80% of the world population lives from less than \$10 per day. More than one billion children live in serious or absolute poverty. On the other side we have the 1.542 billionaires. Total billionaire wealth rose by 17 percent from USD 5.1 trillion to USD 6.0 trillion in 2016. One billion and more people can't (properly) read and write. 1.6 billion people do not have access to electricity. 3 billion people live without sanitation. 2.5 to 3 billion people cook with fossil fuel.

43.This is what the future generations will have to live with all consequences: Desertification per year: 10 million hectares. Land loss (soil erosion): 6 million hectares per year. Forest loss per year: 5 million

hectares. Toxic chemicals released per year: 9 million tons. Now, multiply this by 10 years, 20 years, 30 years, and 50 years. All this together will not be a walk in the park.

44.Oil is used in plastic, painting, medicaments, cosmetics, television cabinet, CDs, DVDs, food stuff, foamed material, window frame, container of all kinds, synthetic materials, colorant, dyestuff, cars, ships, vessels, all kinds of motor vehicles, electricity production, petrol, diesel, kerosene, heating, and so on. For some products there will be a substitute, but never for all needs.

45.Elaborated sewage (also from the agriculture and farming) contains a cocktail of medical elements; e.g. such as antibiotics and hormones, medication from animal breeding, fish farms and pesticides. It kills insects which form part of the complex food chains. In the nearer future this will break all food chains.

46.The total population of flying insects has decreased by more than 75 per cent over 27 years. Scientists discovered a major decline of bees, butterflies, moths and other winged insects. The ecosystem of the wild insects is valued at nearly \$60 billion annually, alone in the United States. Cause: pesticides (Glyphosate), fertilizers and year-round tillage.

47.Pollution (fine dust) kills more than 9m people per year. The monetary cost in welfare losses are estimated at \$4.6 trillion per year. But this shows us only the peak of the Iceberg. All other millions of victims from hundreds of contaminants in the air, in products, in all ecosystems and e.g. from mining are not included.

48.More than 15,000 researchers from around the world warn that the time is running out in the battle to sustain the future health of the planet. Two and a half decades on, the future of the planet appears even worse than calculated up to today.

49.There is no chance to prevent the destruction of the planet and the collective human development. There is no chance to free the collective from the mess and to implement evolutionary solutions. It is also no chance to bring billions of humans back to the archetypal path. Nature will find a way?

50.There is no 'savior' or Messiah that could put in order the global mess. The common people and the leaders of all institutions, both together have created this mess. They have to commonly give an immense effort for catharsis and renewal. But there is a complete lack of the right education of the leaders.

51.The human evolution means in the core the development of the soul which consists in an indelible energetic body. Each soul has an eternally valid, indelible identity forever. Each human is first of all his own challenge and meaning of life; also for his position in the other world (once dead).

52.The religions are without evolution: hardly one of the 22 diverse mental functions, given by the biological structures, is shaped according to the function and capacity (of each function) and its multiple interrelations for an all-sided balance. But the prototype for becoming a human is genetically given.

53.The hostilities between Judaism, Christianity and the Islam are almighty since ever. But the only true religion for humanity is the path of the archetypal, holistic psychical-spiritual development. Being a human is an all-encompassing life school towards fulfillment.

54.Principally it is possible to deform in any ways all mental functions of humans, even extinguish much (most) of them. This archetypal secret ('mystery') is known since millenniums. Certain circles abuse this knowledge. What remains is the magical fundamentalism which is in its core nothing other than deicide.

55.But there is one mental function that can't be perverted: the force that creates the dreams! This force is the most powerful potential humans have. But people must learn how to correctly interpret their dreams! This requires that the psyche is shaped the right ways. For that people must learn a lot about life.

56.No human becomes 'bad' through procreation. The absolute evil starts with the small 'bad'. It emerges prenatal through mother, father and the environment. It is build up over millenniums in the collective unconscious; therefore collectively inherited. There is only one salvation: the archetypal forgiveness.

57. There is only one man that can execute the collective archetypal forgiveness for the entire humanity. He is sent by God and appointed to do it. During 45 years this man has prepared himself for this mission. Everything is documented, comprehensible, and practically, psychically and spiritually coherent.

58. The rulers will never understand that with their own malformed psyche they drag themselves, their own children and humanity down into the abyss, within 20-30 years. The offer stays: Many people can go the path of the 'Archetypes of the Soul' up to the 'archetypal salvation'.

59. The first step starts with acquiring relevant knowledge, with critical thinking, and with a personal development rooted in the 'Archetypes of the Soul' towards fulfillment.

**60.** Humanity is definitely on a suicidal path. Armageddon in 10, 20 or 30 years is in full motion and entirely man-made. Learn, change and renew everything in your mind and ways of living. Or nature will hit you and billions of people much worse than you can imagine. Everything is documented with 10,000 and more facts in all my books. During 45 years I had to learn everything about what goes wrong and to find and develop the archetypal roadmap that can lead humanity out of the insane mess around the globe.

### Changes through New Ways of Living

*Everybody can contribute to catharsis and renewal of life, of the world and humanity:*

1. Promote a lot your self-knowledge and psychical-spiritual development
2. Elaborate your biography and get rid of unsolved passed conflicts and pain
3. Learn how to efficiently solve conflicts, problems, difficulties and crises
4. Chose a partner that shares with you growing and living with the soul
5. Learn through courses before getting married and procreating a baby
6. Daily write down your dreams and learn and practice dream interpretation
7. Respect your energy and biorhythm and live with a smart self-management
8. Talk daily minimum an hour (average) with your partner and your children
9. Learn to correctly meditate and meditate daily twice 10-15 minutes
10. Never stop asking questions about life, love, trust, hope, belief and the truth
11. Live always rooted in the genuine human values and the Archetypes of the Soul
12. Buy a car only when you absolutely need it for business or going to work
13. Don't drive around with your car just for fun or for a bit of shopping
14. Always buy a car with cash and never with a loan or a leasing or renting
15. Consume 30-40% less petrol (by driving less, driving with care)
16. Use public transport whenever you can and accept walking up to 30 minutes
17. Reduce by 30% the amount of meat and fish that you consume
18. Use 10-20% less water (shower, washing, cleaning, garden, etc.)
19. Reduce lightening, heating, A/C and appliances by 30% (electricity, oil, gas)
20. Moderate if necessary: Smoke 50% less and / or drink 50% less alcohol
21. Use your credit/debit card only when you really need it; at least 75% less
22. Get cash from the bank or the ATM of your bank (to buy everything with cash)
23. Pay all of what your credit card is charged every end of the month
24. Buy 50% less soda/beer/wine (alternatively drink tea at home)
25. Buy local products such as vegetables, fruits, meat, fish, bakery products
26. Buy 50-75% less newspapers, junk magazines, stationery articles (paper, ink)
27. Go on holiday in foreign countries only every 2-5 years; avoid mass tourism
28. Perfume/Toiletry: use 20-30% less (simply do not exaggerate the use)
29. Avoid getting a loan for consumption (work first to get later what you want)
30. Buy 90% less prepared (frozen) meals (cook your own meals)
31. Use detergents sparingly and medicine (psychotropic) when it is appropriate
32. Turn off appliances at home (TV, PC, Radio, etc.) when not used
33. Watch 50-80% less TV every day and examine the value of the content

34. Reduce waste by 50% (package, plastic, newspaper, magazines, paper, etc.)
35. Use the dishwasher and washing machine only when it's appropriate
36. Use your mobile phone or iPhone and computer (Internet, Facebook) 75% less
37. Buy natural and creative toys for your kids and never (plastic) gadgets with batteries
38. Contract mortgages only with a low interest rate and at least 10 year fixed rate
39. Buy a home with at least 50% cash; never buy a holiday home with a mortgage
40. Contract insurance policies with a certain amount of own risk
41. Don't speculate (lottery, gambling, casino, investments, bets, etc.)
42. Go to shopping centers only when there is no local alternative for what you want
43. Every month, buy a book that improves your work, business, life and personality
44. Buy quality goods (products) considering their long term sustainability (value)
45. Buy decorations from local artists (handicrafts) and only local seasonal flowers
46. Eat moderately sweets, chocolate and snacks and maximum once a week
47. All kind of drugs (cocaine, heroin, soft drugs, etc.) are absolutely taboo
48. If you have a garden, use some space for a vegetable and berry garden
49. Plant on your terrace or garden a lot of seasonal flowers and herbs
50. Spend part of your leisure for sport, creative activities (e.g. painting, handicraft)

→ Either humanity finds new evolutionary ways of living, or Armageddon will be unavoidable!

[Schellhammer Books](#)

In all my books you can find 10,000 facts that give rock-solid proof and extensively explain what is described here in short words. You will also find a thousand and more references. It's all the result of 40 years of continuous explorations, analysis, critical complex thinking processes, and contemplations.

Note: The world population creates Armageddon by itself.

Hope and love for the creation dies last.

Dr. Edward Schellhammer

*Disclaimer: The author is not be responsible for any inaccurate or incorrect statements, given that a lot of the information, including statistics, is based on countless sources of expertise.*
