

The 10 Biggest Threats to Human Evolution

There are countless scientists and institutions that strongly warn: A very dark millennium is looming. People must decide what they want for their future and for the future generations!

Is human evolution at stake? This is the most important question that we must ask ourselves today. Do you know about the state of humanity? About the world? About the planet? Whether it is wars or the destruction of the environment... We realize that something is fundamentally wrong today. But how have we gotten ourselves into this mess? What is the root of all this evil?

After 35 years of research, I put it on the table: Human Evolution is at stake! Everyone must decide! Either we face the 10 biggest threats to Human Evolution or we open the door to the Apocalypse.

The 10 Biggest Threats to Human Evolution are:

1. World Population Growth
2. Contamination and Pollution
3. Climate Change
4. Eco-systems
5. Economy
6. Politics and Governance
7. Mass Media
8. Public Education
9. Religions
10. Prenatal and postnatal mind development

- There is never a solution without the truth.
- No solutions with an archaic concept of humans.
- No solution with fundamentalist ideologies and dogmas.
- The truth has lost worldwide, but there is no solution without.
- The most valuable words are abused, distorted, and disfigured.
- Individuals of high expert status and integrity have never a chance to address the world.
- No solution by disrespecting humans' genuine inner and terrestrial needs.
- No solution with violence, ignorance, arrogance, hubris and cynicism.
- Never is there a solution without the Archetypes of the Soul.

Global institutions are unable to reduce and eliminate the threats. The mega risks increase with every year.

The Divine Millennium Declaration

I have all power of attorney from God as the highest judge of all souls on this planet and in the other world. Therefore, you should carefully take into consideration "The 10 Biggest Threats to Human Evolution" and the consequences for you and everybody, and all future generations if you fail in individual and collective changes and renewal.

Dr. Edward Schellhammer, RC

1. World Population Growth

The world population is growing exponentially, around the year 2050 it is estimated that it will reach 9.8 to 10 billion People. The problem is not if there will be enough food and water for everybody. They all also need a shelter, education, work, and more. We are talking about human being: each human being has a body, a mind, and a soul. A human being needs an efficient mental and spiritual development.

Today there are a billion of People living in absolute poverty. They live from 1 dollar a day. Another 2-3 billion people in serious poverty live from a few dollars per day up to 10 dollars per day. Hundreds of millions of people are without work. Around 2 billion people have little work, or insecure work.

Humans need love, care, and security. They need to live many inner values. Apart from physical needs, humans also have 'wants'. Human beings need a positive life perspective with hope, peace, justice, and a certain fulfillment.

In total, famine, hunger, misery, lack of food and drinking water affect up to 4 billion people, constantly or periodically. They can only dream about the satisfaction of basic needs and 'normal' wants.

The world population growth is about statistics. But we are talking about human beings! Human beings have genetic codes, which determine and strive for mental and spiritual development towards optimal capacities. Humans have 22 mental functions that need to be shaped appropriately. This is the genuine 'Human Evolution'.

There are today 2018 up to 5.6 billion people, which can't live and grow rooted in their inner codes. They are robots, have malformed or stunted mental functions, shaped from environment, mass media, mad politics, culture, wars, archaic religion, and a sad history. They are suffocated and paralyzed from endless problems during their lives.

Today 50% of people live in big cities: soulless, lost, and a majority with heavily contaminated air and water. In the future up to 65-75% will live in cities. Most of these human beings completely miss their personal human evolution. They will live in a world that is controlled, 100%. 3-5 days of lack of water, food, petrol, and electricity, and a majority will die. The chaos and dramatic scenes will be beyond imagination. It's all human made!

Every decade more people have needs and wants

- In 36-45 years **an additional 3 billion people** will need food, water, health care, education, sanitation, energy, clothes, shoes, preservatives, and so on.
- In 36-45 years **9.8-10 billion people** will produce gigantic volumes of sewage, air pollution, chemical emissions, waste and contamination in general.

The political and economic challenge

- Within 25 years politics and the economy must improve the living conditions of 3 billion people that today live in absolute or serious poverty.
- During the same time frame politics and the economy must additionally provide to 2 billion new earth dwellers goods, services, and infrastructure.
- In total, within 25 years, politics and the economy must additionally (to the well off people today) provide to these 3+2=5 billion people goods, services, and infrastructure.

Every 12-14 years one billion more people, in total 3 billion more people in 40-45 years, will have needs and wants:

Home, job, work, money for living, education (all levels), public Health Care, medicaments, sanitation, food and beverage, healthy water, electricity, gas, oil, petrol, clothes and shoes, all kinds of products, hardware, detergents, toilet articles, preservatives, cars and scooters, televisions, stationary articles, mobile phones, computer, internet, and so on.

Result: 10-12 billion people need 3 planets for a sustainable life (like average EU, USA).

➔ This is a major threat to Human Evolution!

2. Contamination and Pollution

97% of the planet is contaminated. Incredible amount of waste is everywhere: Sewage, garbage, electronic waste, plastic, drugs, medicaments, detergents, nuclear waste and military waste. Air, soil, sea, oceans, drinking water, nature and animals are dramatically contaminated.

- 2.6-3 billion people have no access to sanitation; sewage goes to the soil, to rivers, lakes, seas and environment.
- The sewage that goes into the sea is full of traces of medicines. When eating fish we take in these chemicals.
- Heavy metals in high concentration can also be found in animal bowels, fish and seafood.
- Poisonous substances can be found in food, in the soil, in the air, in the sea, and then in the body of humans.
- An estimated 14 billion pounds of trash, much of it plastic, is dumped in the world's oceans yearly.
- 250 billion of small plastic pieces are swimming in the oceans; and 500m tons swim in the Mediterranean Sea.
- 223,000 barrels nuclear waste is discharged in the North Atlantic: now leaking; sea life will be contaminated.
- Humans, a fetus, have up to 200 chemicals in their body that should not be there; adults: up to 800 chemicals
- Nuclear waste storage must be controlled and administered for 1 million years and will carry a permanent risk.
- Globally every year millions of tones of antibiotics are being used for humans, animal breeding and fish farms.
- Hormones' substances are found in plastic, insecticide, pesticide, medicines, in cosmetic products, sun creams.
- Billions of batteries in electronic products and cars, which are not correctly disposed of produce contamination.
- In toys, clothes and shoes there are chemical dyestuff that partly leads to allergies and in many cases to cancer.

Pollution is a kind of contamination: Fine dust of all kinds pollutes the planet and the world population. Fine dust from cars, industry, oil heating, trains, chemical and oil industry, coal and gold mining: it's toxic! Pollutants come from toiletry, cleaning products, furniture, building materials, printer, and the odorless adon gas. Traffic pollutes the earth: Exhaust gases, abrasion of tires and driving surfaces, and fine dust from the disk brakes.

Billions of micro species already died. Bees and millions of birds died. Humanity will lose up to 70% of all species. The quality of soil for agriculture deteriorated 50-75%: caused by pesticide, herbicide, fungicide, over-exploitation.

Contamination from 7.6 billion humans has already irreversibly damaged 60% of the ecosystems. With an increase of the world population up to 3 billion people contamination will increase at corresponding rate.

The price humans pay for the contamination is extremely high

- More than 3,000,000,000 people suffer from illnesses and reduced mental capacities due to contamination.
- Chemical reactions in human bodies reduce fertility, create handicapped babies. Hundreds of millions affected.
- Chemical contamination of the brain reduces mental capacities already in the prenatal time: billions affected.

- Many chemicals are in the body of fetus, children, adolescents, adults: toxins in breast milk, food, environment.
- Tiny doses of chemicals have a dramatic effect on the growth of a fetus: it harms the developing fetal brain.
- Tiny amounts of dioxins and other toxins can damage the development of the immune and nervous systems.
- Nobody knows how the human body of billions of people will react above a certain level of toxic cocktail.

☠ **The all-encompassing contamination is a picture about the state of the mental functions of the people.**

☠ **The state of the mental functions of the people is a result of mad politics, economy, education, religion.**

☠ **In 20-35 years contamination and pollution will put humanity at the brink of elimination.**

The political, economic, religious and educational irresponsibility of leaders is outrageous and evil, driven by hate of life, hate of the creation, and hate of God.

The young generation today and those who will be born the coming decades will experience an immense global increase of contamination during their entire lives.

➔ **This is a major threat to Human Evolution!**

3. Climate Change

Climate change is more than just rising sea levels or drought or tropical storms, but: climate change is about human beings! About human life! About human values! About human evolution! Researchers fear that, climate change has already taken on a momentum all of its own.

- Carbon dioxide, methane and nitrogen oxides are the gases that produce global warming.
- Global emission of carbon dioxide will increase until 2030 by 40%
- Acidification of the oceans is a major threat to marine life and humanity's food supply
- The melting of Arctic and Antarctic ice started 1990. Glaciers are melting twice as fast as in 1999.
- Today each year more ice is melting than the amount of ice that exists in the Alps.

Rise of sea level

- The global average sea level will probably rise 1.40 - to 2.40 meter by the end of the century.
- Many islands and coastal towns will be lost at a global warming of 2°C, which is already reached 2016.
- Since the start of the 21st century the average sea level has already risen by 20 centimeters.
- During the next 30 years the rise in temperatures and in sea level will continue.
- More than 135 cities near coastlines will be heavily affected if not entirely destroyed.
- Areas of land vulnerable to flooding will increase by about 50% in the next 40 years.

Irreversible damages

- As a result of the ice melting the algal bloom (Arctic) comes earlier; with major consequences for the food chain.
- Widespread flooding as a result of an increase in sea levels will create major upheaval for hundreds of millions of people. Most coastline land will be heavily affected.

- Huge parts of the planet, beset with over-population, droughts, soil erosion, freak storms, massive crop failures and rising sea levels, will be unfit for human existence.

Weather effects of global warming

- General: Heat waves, drought, fires, rainstorms, floods, tornados, hurricanes, and tropical cyclones.
- Mediterranean and other subtropical regions: increase in wildfires and tropical storms.
- Frequent drought and higher global temperatures could destroy until 2100 up to 70% of the Amazon rain forest.

Effects of global warming on humans

- 3.2-4 billion people will experience water shortages due to climate change.
- Water shortages (2015: 40% already lost) and hunger will be an ever-growing threat.
- Every year an average of over 400 million people are directly exposed to a flood.
- Climate change and its consequences will produce an inter-regional movement of population of unknown extent.

Future Risks for Humans

- ☠ 200-500 million are to be displaced due to rising sea levels, heavier floods, and more intense droughts.
- ☠ Floods will affect 2 billion by 2050 due to climate change, deforestation, rising sea levels, more migrations.
- ☠ An additional 600 million people are at risk of famine due to climate change.
- ☠ Most of the world's major river deltas are sinking; increases flood risk faced by hundreds of millions of people.

Future development of climate change

- ➔ Climate Change will result in a global catastrophe costing millions of lives in chaos, wars and natural disasters.
- ➔ A strong and fast increase of climate change could bring the planet to the edge of anarchy.
- ➔ Widespread flooding do to rise of sea levels will create major upheaval for hundreds of millions of people.
- ➔ Dramatic shortages of water and energy supplies will become increasingly harder to overcome.
- ➔ In 10-15 years around 95% of the global ecosystems humans depend on will be heavily damaged or destroyed.
- ➔ The combined damages between interacting ecosystems will produce combined damages of unknown dimensions.

➔ This is a major threat to Human Evolution!

4. Ecosystems

Humanity cannot exist without the Ecosystems: The air, the lakes, seas and oceans; the rivers and streams; Antarctic and arctic; glaciers and snow; arable land, soil and forests; micro-organisms; species of plants and animals; fishes and sea fruits. Humanity cannot exist without! Yet, all humanity does destroy this very fundamental framework.

Destruction of the ecosystems

- 70 to 90% of the available water is used by the agriculture and animal breeding industry.
- 25-35% of all plant and animal species at increased risk of extinction, which affects agricultural production.
- About 2 billion hectares of soil have been degraded due to environmental degradation and industrialization.

- Worldwide, soil erosion has caused abandonment of 4.3 million km² of arable land during the last four decades.
- Over the past 40 years, approximately 30% of the world's cropland has become unproductive.
- 75 billion tons of soil, the equivalent of nearly 10 million hectares of arable land, is lost every year.
- By 2100 only 18 – 45% of today's rainforests would still exist. Tropical forests are home to many species.
- Around 41% of the oceans are badly damaged as a result of direct human intervention.

Oceans: Fish and sea fruit

- The seas and oceans are extremely exploited; important fishing resources are destroyed.
- Fishes and seafood are 'eating' unimaginable chemical and drug cocktails of residue.

Exploitation of natural resources

- The world is committing collective suicide by consuming resources without replenishing them.
- Most corporate groups don't care about environmental destruction or contamination.
- The 3,000 most important corporate groups produce environmental damages of \$2-5 trillion each year.
- The economic and human costs of these damages are higher than the profit of all corporations together.

Over-exploitation

- Billions of bees are dying every year. Bees pollinate over 90 types of vegetables, fruits and grain.
- The entire human food chain is in danger given that 80% of all edible plants are dependent on bees.
- Most natural resources are exorbitantly overexploited and within 40 years will be destroyed.

Loss of species

- The loss of species is increasing at an alarming rate. The reasons are: construction, urbanization, deforestation, overfishing, climate change and invasive species – and countless toxins.
- The diversity of species on our planet provides the basis of the fundamental elements of our ecosystem such as food, drinking water, medicine, wood, and so on.

Water resources

- The water in most cities is contaminated. Pesticides are found in food chains and everywhere in water supplies.
- It is estimated that 75% of Asian's surface water is now contaminated by human and agricultural waste.
- By 2020 about 30-40% of the world population will have serious water scarcity.
- By 2040 there will not be enough water for the world population and food production.

Victims of damages ecosystems - food

- All species of wild seafood (food!) will collapse within 50 years.
- An additional 600 million people are at risk of famine due to climate change.
- People already living in poverty will be the worst affected by climate change.

Over the past 50 years 60% of the global ecosystems have been irreparably damaged. In 10-15 years around 95% of the global ecosystems humans depend on will be damaged. 80% of the world population must expect serious consequences in 20-30 years.

➔ This is a major threat to Human Evolution!

5. Economy

Economy consists in many systems of finance, production and services that makes work and flourish a society.

The richest and the poor (2017)

- At least 71% of humanity lives on less than \$10 a day.
 - 3.5 billion People live from less than \$2.50 per day.
 - 5.6 billion People live from less than \$10 per day.
 - The 1.4bn remaining population is much better off.
- 8 individuals dispose of the same amount of wealth as the poorest 3.6 billion people (2017)
 - 1826 billionaires (2016): aggregate net worth of \$7.05 trillion.
 - Total billionaire wealth rose by 17 percent from USD 5.1 trillion to USD 6.0 trillion in 2016.
 - The global financial elite dispose of \$42.7 trillion.
 - 2016: 62 people have as much wealth as worlds' 3.7bn poorest people.

Critical economic parameters

- The Superrich: Concentration of wealth versus 5.4bn poor people
- Exploitation of Manpower: Child work, slavery, low wages, miserable working conditions
- Unemployment, Underemployment: High rate, not enough earning, lost youth: 2bn people affected
- Poverty: Famine, hunger, misery, lack of (healthy) food and healthy drinking water
- Banking, Monetary: Speculation, financial crisis, money creation, cheat, scam, abuse, no transparency
- Economy: Public debt, consumer debt, living standard, concentration of money, no transparency

Animal breeding industry

- In the US the animal agriculture industry consumes around 55 per cent of the water.
- Around the world, the meat and dairy industries consume 30 % of all fresh water every day.
- The animal agriculture industry is responsible for 18% of all greenhouse gas emissions.
- Livestock and their byproducts account for 32,000m tons of carbon dioxide (CO2) per year.
- Cows produce around 567 billion liters of methane daily; methane is much more damaging than CO2.

US Food and products - Examples

- 3 Corporations control 80% of the (US) meat market
- 70% of food products have genetically modified ingredients
- Pesticide and many other (toxic) chemicals are everywhere in food and tea bags

Result of over-exploitation: Corporation robbery

- Arable land: soil degradation (over-exploitation, chemicals)
- Extreme over-exploitation of resources, sea-fruit, fishes, water resources, forests, and so on.
- Negative externalities of mining (toxins, poisoned land, water)
- Most natural resources exorbitantly overexploited; destroyed in 40 years.
- Wheat, grain, corn, rice, cocoa, fruit juices, sugar, meat, and coffee are fields for speculators.

➔ Nobody has an idea how to reach a global economic balance. Is there a way to reach a global economic balance?

➔ The future generations during 200 years will have to pay for the public debt.

➔ The future generations during 200 years will have to pay for the losses.

➔ The future generations during 300-500 (or 1000 and more) years will have to pay for the damages.

Technology and unemployment

- Technological development will replace 75-80% of all work
- Technology will radically dominate the global market
- 2030 Global unemployment will be the standard

Everywhere increase of costs due to direct damages; trillions per year and for long term! It's about humans!

➔ **This is a major threat to Human Evolution!**

6. Politics and Governance

Politics and human values

- Politics ignores most precious human values many pioneers identified during many centuries.
- Politics is cynical, hostile, arrogant, and bellicose towards the people, provinces, other nations.
- Politics is not connected with the people, the sovereignty of people, and the lives of the people.
- Political democratic practices and declarations are a ridiculous masquerade of gigantic scams.
- Politics is a world of incompetence and extreme lack of understanding people and their lives.

Political executive

- In the world of politics too many people are archaic, undeveloped, imbalanced, and soulless.
- Politics is stuck in a marsh of lies, perversion, falseness, rigidity, arrogance, cynicism and insanity.
- Too many politicians are self-opinionated, cantankerous, dogmatic, big-headed, and stubborn.
- Too many politicians are masters of deceit, corruption, which is also a pest in the judicial system.
- Too many politicians are incapable of truthful dialogue, renewal of attitudes, and new thinking.
- Political negotiations and decision making processes can't be better than the state of the mind.

Failure of politicians

- Most politicians have no comprehensive knowledge of the peoples' situation, of humanity and the planet.
- Most politicians have an archaic understanding of mankind - in the core unchanged since millenniums.
- Politicians have always acted with megalomania, greed, arrogance, falseness, scrupulousness, and amorality.
- Most politicians do not want any truth. Therefore, they are never in the position to solve the big problems.

The inherent systemic rules of governance

- To reign is enough to control the flow of money and debt mechanisms
- All relevant systems in a society must be fully dependent on banks
- Control the banks and money flow and you control the world or much of it
- People must depend on private debt, on consumption or stay in poverty
- People must be naïve, blind, lured, deformed, individualists, egoists, dehumanized
- Education must pre-program the failure in the future of most people's life

A systemic anti-evolutionary virus is present everywhere in the lobbies, foyers and anterooms, in all kinds of households, wheeling and dealing like servants behind the curtains.

History of wars

- Around 14,000 wars during the last 5,000 years! That's what governance is trained to do well.
- 1945-2012: Estimated 270 wars plus estimated 130 war-like conflicts involving the US and NATO.
- US and NATO killed millions, destroyed entire countries, created immeasurable misery and suffering.
- Christianity has killed through wars 'in the Name of God and Jesus Christ' up to 1 billion people.

Since 1945 endless wars staged by United States and NATO without being attacked or in real danger.

The victims of mad politics

- People suffer from the abuse of political power, from lies and incompetence in governments.
- People are exploited as human biomass by the industry, economy, politics, and banks.
- People will have to pay interest and repayments on exorbitant public debt and costs of wars.
- A majority of governments are destroying the livelihoods of their future generations.

The worst criminals who have committed the worst atrocities have always been and still today are political leaders.

Humanity urgently needs new, efficient and balanced politics and governance between and within nations.

➔ **This is a major threat to Human Evolution!**

7. Mass Media

Six conglomerates control information and entertainment in the United States, in Europe and in much of the world. Media Power is in the hands of a few elites. The corporate Media (in the US, EU) operate globally and reach 4-5 billion people every day through thousands of different channels around the world.

Their strategies and tactics

- Selection: Inform only what is in their interest
- Everywhere the same information and story line
- Repeated lies over and over again becomes the truth
- Attacking motives, character, sanity, intelligence
- Turning reality into the opposite of the truth

TV-influences and TV-consumption

- Number of hours per day that the TV is on in an average US home: 6 hours + 47 minutes
- Number of murders seen on TV by the time a child finishes elementary school: 8,000
- Number of violent acts seen on TV by age 18: 200,000
- Hours per year the average American youth watches television: 1,500
- Number of 30-second TV commercials seen in a year by an average child: 20,000
- Number of TV commercials seen by the average person by age 65: 2 million

Effects on TV consumers

- People copy inefficient and illusionary patterns of solutions for all kind of concerns.
- People copy the kind of communication and behavior they see in the media.
- There is absolutely no psychical-spiritual support transmitted from the media.
- Media, marketing, politics, and religions have no interest in revealing life lies.
- TV shapes the mind, idealizes soulless humans, makes people stupid or helpless
- TV consumers are not simply brainwashed, but much more entirely dehumanized.

Marketing today sells targeted human values, emotions, ideologies, ideals, norms, attitudes, lifestyle, and culture.

- ➔ People are brainwashed with an illusionary world, an impossible self-identity (lie).
- ➔ People are directed the way the corporate group wants them to go and for their interests.
- ➔ Most marketing of corporate groups destroys the inner life and authentic growing of people.
- ➔ In TV programs there are no or rarely genuine human values that shape true human evolution.

Brainwashing

- Every person is exposed to marketing every day hundreds of times.
- An estimated 80% of all information given to people is irrelevant or deceiving.
- The Media does not report in a network-analysis and often hides delicate background information.
- The Media chooses what they want to report on; and do not report what is not in their interest.
- History as presented in teaching books does not reflect the human realities.
- In politics they feint everywhere with statistics in order to camouflage facts.
- Politicians, financial and industrial corporate groups, religious leaders lie all the time.

- Hundreds of thousands of products are offered with seductive slogans.
- People are fed with sensations, stupidities, and absurd or mad behavior of people.
- ⊗ Mass Media information is what chocolate or wine is to our body.
- ⊗ People can't know what is relevant, constructed or 'fake news'.
- ⊗ News damages brain and body as people are chronically stressed.
- ⊗ News makes people passive, helpless, fatalistic, and sarcastic.

The Mass Media is destroying the human evolution, creating dehumanization, crushing all precious human values, and therefore are highly responsible for the dire global state of humanity. Behind are individuals that suffer from their own hate of God since 2,500-2,800 years. They are the true actors of global Deicide.

➔ **This is a major threat to Human Evolution!**

8. Public Education

Public education ignores and destroys human evolution due to a wrong concept of mankind. That's why all achievements for public education have failed in achieving global peace.

Failure of public education

- The ignorance and exclusion of human's spiritual intelligence, emotional intelligence, intuition and creativity
- The lack of education for mastering life: money-, self- and life management, relationship, marriage, family life, etc.
- The ignorance about human values such as love, care, truth, psycho-social security, inner roots of integrity (ethics)
- The lack of complex thinking about life, philosophy, spirituality, the mind, the environment, politics, the media, and consumption
- The absence of topics such as lies, cheat, deceit, falseness, narcissism, neurotics, psychopaths, brainwashing, etc.
- The absence of spiritual needs, understanding meaning, dealing with dreams, and psychical-spiritual development.

Global need for new education

- Billions of people are brainwashed, manipulated, suppressed and infiltrated by lies, cheat, fictions, and illusions.
- Billions of people want to love and to be loved, happiness, satisfaction, success, but don't know how to make it.
- Billions of people are pushed into mental and emotional chaos, stress, fear, meanders, and endless problems.
- Billions of people are exposed to propaganda, manufactured opinions and consent, and absence of the truth.

The shaped mental functions of all people have different qualities, from a totally distorted and malformed state to a highly developed and all-sided balanced well functioning.

Misery of global public education

- Public Education is founded on an archaic understanding of humans and human life, not on human evolution.
- Public Education does not consider a holistic forming of the mental functions and the meaning of being a human.

Accreditation bodies of education

- ❖ Totalitarian, arrogant, compulsive and mad control of absolutely everything
- ❖ Obsessed with brainwashing mankind already from an early childhood
- ❖ Authorities of educational institutions have become mere 'executors'
- ❖ Make educational institutions fully dependent, submissive, and obedient
- ❖ Outrageous strive to devalue educational authorities and institutions

Accreditation dictates

- ❖ Regulative rules that suffocate any progressive pioneering innovations
- ❖ Full of straitjackets that paralyze any substantial creative development
- ❖ Perverse obstruction of all mental, psychical and spiritual potentials
- ❖ Confusing labyrinth of norms, rules, and regulations around every 'corner'

Academic accreditation bodies

- Accreditation criteria are based on totalitarian, compulsive control of every tinny element.
- Accredited Bachelor programs serve ultimately the power interests of the top elites.
- Accredited Bachelor programs have no chance to critically respond to the world.
- Accreditation criteria don't allow investigating the lies of Western politics and history.
- Accreditation criteria don't allow investigating the perverse propaganda concepts.
- Accredited Bachelor programs castrate the potentials and talents of the teachers.
- Accreditation is anti-evolutionary, anti-truth, anti-democratic, anti-free market, a scam

What scholars on all levels learn about ethics and human rights is not rooted in a holistic psychical and spiritual development; they are not trained to manage their development; therefore it is inefficient and a failure.

➔ **This is a major threat to Human Evolution!**

9. Religions

If any of the (genuine) Prophets since 3000 years, especially Jesus Christ, would reincarnate today, most people would scream: "Crucify Him!" The collective law: Never unveil the truth! - People haven't learnt anything since 3000 years!

Characteristics of Archaic Religion

Teaching excludes the holistic shaping of the mind; worse: has no concept of the psychical-spiritual development.

Religions have forgotten the eternal Archetypes of the Soul, which are indispensable in order to reach complete fulfillment. Archaic religions abuse the laziness, narrow mental qualities, high greed, and fearfulness of the people.

Fundamentals of human evolution

- All psychical and spiritual functions have to be formed in a balanced way. Without this forming process, salvation isn't possible, not with any religious or spiritual or magic belief or practice. Religions don't teach such concepts.
- Religion, its teaching and practices, can't be better than the operational quality of the shaped mental functions of their agents and authorities. And Atheism is a result of malformed minds, of lack of holistic development.

Mental reasons to believe

- 👉 Humans are lazy, lazy to think, sluggish, superficial, stubborn, don't want to learn.
- 👉 Humans want easy, fast, simple and direct solutions for their salvation.

- ☞ Humans do not want to take responsibility for the truth.
- ☞ Humans themselves play false, mendacious and deceitful games in life.
- ☞ Humans don't have substantial knowledge to question themselves / others.
- ☞ Humans believe in archaic nonsense because they themselves are archaic.

The word 'Spirituality' has been distorted, abused, filled with hot air billions of times. Spiritual qualities require quality of all mental functions. Love is a spiritual function. Peace has a spiritual meaning. Love between a man and woman is especially spiritual. Marriage has a deep spiritual and archetypal meaning, but has been stolen by homosexuals.

■ Religions have stolen the transcendental archetypal experiences that wise people, spiritual kings, and prophets performed and received in dreams. Billions are enslaved in such stolen/perverted religious or spiritual labyrinths.

■ Christians have stolen the holy books from the Jews, created their Vulgate (the Bible), and Mohammed (later Moslem authorities) ended up taking all of the Jewish religious history and of the Bible, and created their own holy book.

Religion without dreams and the spiritual intelligence

■ The spiritual intelligence is creating the dreams in order to guide humans towards completeness and fulfillment.

■ The spiritual intelligence is the only source to understand Soul and God (dreams). Dreams can't be manipulated.

In the history of mankind, the inner Spirit in the soul of some wise men and women made vivid these Archetypes in their mind and soul. Today the entire world population does not have any authentic proof of and inside in the inner processes of any Prophet in the past, documented with dreams and practical work. Leaders of Religions, priests and the worshippers today do not know anything substantial about such inner processes.

All stories in the Old and New Testament are legends, myths, sagas, fictions, anecdotes, full of manipulation and deceit. Primary texts of Holy Scriptures don't exist. The Old Testament is an artifact with many erratic statements from different societies over millenniums. Nothing is authentically documented about Abraham, Moses, Jesus, Apostles, and Gospels. Nothing in the Bible is 'holy'. Religions are never 'infallible'. Genuine and true religion is something totally different.

The Crucifix: Death penalty such as the electric chair or the lethal injection today! Corpse: dead, the end, sadness, suffering, hopelessness, darkness, forlornness, and absence of God! No hope, no love, no care, no zest, no justice, and no power of the inner Spirit! No life, no joy of life, no happiness, no satisfaction, no lust, and no fulfillment! Accusation, reproach, heating up hate, depression, fear, guilt, rage and revenge! This symbol can never guide the archetypal and divine human development (evolution)!

➔ **This is a major threat to Human Evolution!**

10. Prenatal and postnatal mind development

Part of the brain is responsible for bodily functions. Another part consists in unities responsible for the mental functions. The mental part of the brain consists in elements that are like 'microchips' - coded for specific mental operations. The code (a kind of software) of each 'mental microchip' must be developed, nurtured, its potential trained and strengthened.

The human mystery

Explorations of the prenatal time unveil the facts about human evolution and core key of the 'human mystery'. Humans' mystery, human life, the principles and purposes of human evolution appear in a new perspective.

The mental functions determine the human, the human's life and the human's mystery!

☠ Toxic influences already in prenatal times and early childhood

There are toxic elements during prenatal times that influence the development of the brain in a critical way.

Bad is: Alcohol, tobacco, drugs, medicine, chemicals, external contamination, pollution, fine dust, mother's lack of hygiene, dirty water, lack of vitamins and minerals, certain radiation, bad nutrition, mothers' illnesses ...

Critical influences in the prenatal development of the brain predetermine also the development of the mind.

☠ After birth bad influences (baby and infant)

During the first years there are elements that influence the development of the brain in a critical way: Contamination, pollution, dirty water, ignored hygiene, lack of vitamins and minerals, housing (slums), lack of care for health, ignored hygiene, chemicals in food, lack of basic nutrients, environmental and social experiences, etc.

Bad life experiences lead to critical mental development

Emotional problems. Learning difficulties. Fear and rejection of life. Depression. Despair. Psychopathy. Psychosis. Eating and sleeping disorder. Drug and alcohol problems. Behavior disorder. Sexual disorder. Submissive behavior. And so on.

Prenatal bad experiences determine the shaping of the mental functions, for example:

- ☞ No sensitive, responsive care
- ☞ Lack of satisfaction of mental needs
- ☞ Insecure parental relationship
- ☞ Bad (very low, poor) economic conditions
- ☞ Lack of satisfaction of physical needs
- ☞ Thoughtless parental relationship with baby/child
- ☞ Lack of (creative) learning stimulations
- ☞ Maltreatment, child abuse, violence, humiliation
- ☞ Lack of environmental security, protection

From the prenatal time up to the age of 3-5 the mind of an infant is decisively shaped for the rest of its life

Scientists of Epigenetics, Freudian Psychoanalysis, Szondi Analysis, Jungian explorations and more findings of other pioneers have given proof that 'complexes' (patterns of conflicts/traumas) are transferred on to several generations.

The early programmed human

The prenatal health, mental, social, and behavioral state and the experiences of the mother during pregnancy as well as toxic and violent environmental factors in general and scarcity (of needs) influence the biological (brain) and the development of the mental functions of the fetus with risks of effects during the entire life course.

Conclusion: Contamination + bad experiences + bad upbringing + distorted and reduced public education + malformed mental functions + a mendacious and hostile environment = **result in misbehavior and destructiveness!**

➔ **This is a major threat to Human Evolution!**

The dynamics of the major threats to Human Evolution

Taking these 10 major threats of humanity into one picture, we must also add some critical principles:

- Each complex parameter has a dynamic of its own.
- The mega-parameters build up accumulation.
- Accumulation occurs since decades and centuries.
- There is a rapid increase of accumulation in all fields.
- There are complex interrelations between systems.
- All parameters stay in interdependences of others.
- All systems show all-embracing negative effects.
- There are interactions between systems and humans.
- The complex dynamics have no boundaries.
- Criticalities are bounded in systemic conditions.
- Ideological and dogmatic belief increases criticalities.
- Humans are always the responsible agents.
- The roots of evil lie in the malformed minds of people.
- In all systems we identify systematic dehumanization.
- There is systemic hate of God and the creation everywhere.
- The dynamic of all parameters is coded for Deicide.

But there is still hope

- ☹ People have made terrible mistakes; but they can profoundly learn from it.
- ☹ People have ignored and neglected the most important human values, but can find them back.
- ☹ People have lost themselves in running for illusions and superficial or egoistic purposes.
- ☹ People have played with lies, cheat, deceit, distortion, delusion and empty promises.
- ☹ People have ignored that all humans on earth are a divine creation. But people can learn.

People must change their view, thinking, ways of living and attitudes

- ☑ People must find new faith in themselves, in their inner Spirit, in their inner potentials.
- ☑ People must become creative, innovative and pioneering for new knowledge and new solutions.
- ☑ People must aspire to new goals and meaning of life with strength, endurance and perseverance.
- ☑ People must cooperate, talk, discuss without taboos and take decisions together.
- ☑ People must go through a catharsis and complete renewal for the future generations.
- ☑ People must solve the immense global problems with soul and mind, but not with wars.
- ☑ People must unify humanity for a cooperative, balanced, peaceful and equitable path.

Importance of new education

- Education has highest importance as the new fundamental preparation for success in life, love, work, and renewal in a very fast changing world. All mental functions must be shaped for completeness and fulfillment.

- The immense problems of humanity and the planet can't be solved without fundamental renewal of education and especially a fundamental revision and re-construction of political systems, economics, and religion.
- Constructive behavior in personal life, in social life, in political participation, in the world of work and business must become subjects and topics of science and public education adapted to all school levels.

Holistic and permanent all-embracing psychical-spiritual development aiming for inner satisfaction and fulfillment must become subjects and topics of science and public education adapted to all school levels. Spirituality rooted inside, moral integrity, meaning of life, respect for humanity, nature, animals and the protection of the planet and its ecosystems form the essence of meaning of each human and his life.

Deicide

'Deicide' means: Killing God (whatever the concept of God people may have in their mind). But obviously humans can't kill the Creator. Therefore they try to kill his creations with the purpose to create Him pain. Why?

'Deicide' means: Hate of life and of the creation, in action: destroying the planet with all its ecosystems, humans, humans' potentials, folks, nations, societies, cultures, peace on earth, justice, healthy food and drinking water, and with that the entire human evolution.

Deicide is a global operating virus

- ☠ The virus has infected societies, people, and the planet around the globe.
- ☠ The virus creates imbalance in society and in the mind of people.
- ☠ The virus creates strife, animosity, distrust, and hostility everywhere.
- ☠ The virus loves wars and the most atrocious criminals are always politicians.
- ☠ The virus operates like an invisible hand or as psychical mental functions.

The virus understands itself as the superior and exceptional creation on earth, standing above all human creations, all nations, all head of states, all royalties, and especially above all the people.

The roots of the Deicide program are more than 2500 years old, in Genesis I, verse 28: "Dominate the entire world, every vivid and non-vivid thing!"

Deicide in practice

- ☠ Dehumanizing and degenerating mankind means to destroy God's creation.
- ☠ Destroying societies and countries means to destroy God's plan for evolution.
- ☠ Excluding the inner Spirit means to destroy the Spirit of God on earth.
- ☠ The falseness in economics, politics, religion, and media eliminates God.
- ☠ To abuse the highest Archetypes of God and with that the roadmap of evolution.

The deicide virus makes people sick

- ☞ Full of Lies, Self-lies, Life-lies, Falseness, Cheat, Deceit
- ☞ Religious-psychotically Driven, Obsessed, Ideological Fanatics
- ☞ Neurotic, Narcissistic, Necrophiliac, Psychopathic, Psychotic
- ☞ Chained, Suppressed, Enslaved, Exploited, Abused, Violated
- ☞ Suppressing, Exploiting, Stealing, Destroying, Enslaving
- ☞ Oppressing, Killer, Embitterer, Bellicose, Brutal, Unscrupulous
- ☞ Destroyer of Nature, Species, and Ecosystems
- ☞ Murder of the Truth and of the Genuine Human Values

The decide virus destroys the planet

- ☠ Destroying the world of species means to destroy God's creation.
- ☠ Destroying the resources means to destroy God's plan of evolution.
- ☠ Economics, politics, and religions have perverted the true source, called 'God'.

As a whole network covering the entire humanity, Decide destroys humans, the world, the planet, the archetypal human evolution, and therefore the divine plan for all souls on earth to build up inner qualities.

Sane authorities in all countries must bring to account those who commit collective decide. They must create new laws and define punishments, appropriate to the damages the decide agents produce on the planet, the world, the people, the folks and the archetypal human evolution.

Roadmap 25 for Global Renewal**Strategic, Tactic, and Organizational Principles**

*Complete change and renewal (national and global) must be reached within 25 years.
The years 2018 until 2020 encompass all kinds of planning and preparations.*

- Changing a society needs a minimum of 25 years for sustainability
- Each change (with renewal) has a time frame of 5-25 years
- 2% average change per year leads to 50% changes in 25 years
- 4% average change per year leads to 100% changes in 25 years
- Each change of 2-4% requires a replacement of 2-4%
- There is no solution valid for everybody and everywhere
- Each topic, area, culture, folk need its specific approach
- Each country has its own variety and complexity of criticalities
- One must start even if all others still reject solidarity
- Any intervention in a topic has effects within its network
- Changes of a mega parameter influences other mega parameters
- Intervention is not successful if collateral effects are ignored
- Collateral effects must be controlled and transformed
- People must be educated for changes and renewal
- People must be informed before decisions and actions
- People must feel the innovation as their wish and idea
- People must see the advantage and benefit of a change
- Libido-ties must be redirected to the new implementation
- Obstacles must be taken away before an implementation
- Democratic proceeding is not possible with uneducated people
- People are lazy, greedy, stubborn, neurotic, egoistic, obsessed
- Immense effort is necessary to educate people for changes and renewal
- Nobody gives away personal benefits and advantages freely
- Urgency because of increasing damage comes before importance
- Taking away something requires replacing it with something new
- Essential: eliminating and completely replacing it or part renewal
- The bigger the matter of change, the longer the preparations take
- Complex changes must be divided into small changes step by step
- Small changes sometimes can be done within a short period
- Principle of single measures: 80% preparation; and 20% renewal
- Planning changes requires to strongly focus on the young generation
- Changes must focus on age groups: 6-12, 13-17, 18-29, 30-49, 50-67, 68+
- Changes must also focus on urban criteria (village, town, big town, city)

- Citizen's networks of max 5,000 people must be created for contributions
- Networks of specific population groups must be created for contributions

With some first changes in politics, geopolitics, industry, economy, religion and the ways of living of the people around the globe it is possible to generate estimated minimum \$3 trillion per year for changes and renewal. Within 25 years \$75 trillion would be at disposal for complete renewal of the world. And around the year 2045 humanity would be on the track of the archetypal human evolution.

No solution without the 'Archetypal Religion'.

If everything continues as usual, humanity will experience the elimination of the human evolution within decades.

Final words

There are countless scientists and institutions that strongly warn all: A very dark millennium is looming. Human evolution is at stake! The total collapse could occur within 10-20 years.

People have to clean up the mess themselves! There are less than 4-5 years left to implement first strong changes. What happens today, will affect humanity in 5, 10 or more years.

It will take 25 years to establish the genuine (archetypal) path of human evolution.

I came to earth 2,000 years ago and again in the 12th century in Spain. Both divine missions failed terribly. Now, I was ordered to come back again. I didn't like it at all.

I have all power of attorney from God as the highest judge of all souls on this planet and in the other world.

People must change or the destruction of human evolution will occur. You want peace, justice, balance and hope; then you must make it! People must change and renew for their evolution.

If the heads of governments, religions, and mass media hinder me to do my job, and if they do not support my pioneering divine project, I will send these souls into a dark place, far from God and his light for 50,000 years.

Leaders in all systems of society must manage changes and renewal towards archetypal human evolution. If they reject to do so, their soul must expect to get up to 30,000 years of being far from God and his light.

The all-powerful string-pullers behind the curtains will get up to 100,000 years 'dark hole' if they do not immediately change their Deicide program into collective archetypal human evolution.

If human evolution will be entirely destroyed, I will send all souls into a dark place, far from God and his light for 200,000 years.

I can guide you. I can give you absolution for the entire evil past and present. But this must be based on sustainable results of actions. Human evolution must be established with the 'Archetypes of the Soul'.

As a measure of discipline I have closed the door to Paradise for all souls - with some exceptions - until the complete enlightenment of the truth is achieved globally.

The Schellhammer Institute offers non-academic programs for all and provides you with the indispensable knowledge, education, advice and guidance.

The young generation gets the most advanced preparation with a private Bachelor or Master Program or with non-academic programs at Schellhammer Business School.

Document of Highest Archetypal Processes of the Soul

(Extract from Dr. Edward Schellhammer, "The Manifesto")

Dream: *"Find the mystery of mankind!"* somebody invited me.

Dream: An owl is guiding me.

Dream: Out of my abdomen a little tree grows.

Dream: I receive a sword, a sceptre, a globe and a cross; these symbols I compose into a circle-cross-Mandala.

Dream: I am in various churches, in ecclesiastical libraries looking for the truth. What I find is a lot of dust and stones.

Dream: I experience a ritual: *"God nourishes you, God strengthens you, God protects you, and God guides you."*

Dream: I go to the Valley of the Kings with seven white elephants.

Dream: I receive a goblet and I am summoned to search the mysteries of life in it.

Dream: I'm able to draw the sword of the king of the Grail from the rock and then I'm given an orb.

Dream: The ruler of the collective unconscious world of souls points his finger at me and shouts: *"This is the new Messiah!"*

Dream: I'm unified with this light; I am one with this sun. *"This is the unio mystica"* I hear said.

Dream: Preparations for a celebration "accomplishment of the Individuation process" is made.

Dream: Within me is the temple of the Holy Grail. Actually I know everything.

Dream: A voice: *"He, the Individuated man, has a particular assignment in this world, only thought (made) for him. Only he is worthy for it since he is the man of God, the third in the covenant with God and the Spirit."*

Dream: *"You know how life grows. You are life. You are being. You only do what you are. You come from the source in God. You understand the primal source of life. The people want bread from you",* somebody says.

Dream: I've reached the goal. I've got the water and the fire and I know the path and the goal.

Dream: *"You know that God does not go to man, man has to seek God. God is life, wisdom and love. God is within you; you are in God. The signet ring is guaranteed to you. You are the king. You are the trustee of a concern which is not of this world. The new man is born."*

Dream: Through the fog I see the future. More and more people get ill and die.

Dream: The president of the USA has allowed me to tell him one of my dreams in front of the plenary assembly, and so I speak: "I saw a king coming to Europe, as pure and clear as none before. And I saw that all the nations disarmed; and I saw, how the king brought peace to all people on earth, the peace from God." Suddenly I realize I am talking about myself.

Dream: The Spirit says: "You are appointed and ready: The Messiah is great and alive. You have got the proper equipment to face the world."

Dream: I experience, that I have passed all the ordeals (trials) in the union with God.

Dream: The inner Spirit speaks to me: "You represent God on earth. Nobody else! You have got all the powers of attorney. Make use of them. You are a true king of the Holy Grail. The world of souls is your kingdom. God loves you very much."

Dream: One of a group of spectators shouts out repeatedly: "This is truly the reincarnated Messiah, have mercy upon us." Then all of them pray this in a chorus.

Dream: The evil, a figure of horror, approaches me and says: "And you're playing the second leading part."

Dream: I receive 'cosmic scissors' and with them I cannot only cut and separate, but also join together and create wholeness.

Dream: I receive a new signet ring with twelve gemstones. "This is the ring of the Messiah" it is said.

Dream: I am wearing the signet ring: "No one dares to wear this ring and the last one who did, was living 2000 years ago."

Dream: Those, who perpetrate atrocities against the values of love and the Spirit, are severely punished in the spiritual world.

Dream: A king has got two pharaoh birds, very colourful and marvellously beautiful. It is said that these are magic birds. We come to the city of Jerusalem. I'm very glad we've finally reached the goal together with the kingly birds.

Dream: The Reincarnated Christ has got a unique relationship with the sun: He carries it on his hands, but it is also within him, he calls it and gives it to the people whenever they want it.

Dream: The punishment is pronounced and sealed. Only the reincarnated Messiah can annul it. No folk can ignore his Messiah without the gravest consequences for the collective.

Dream: I am in the Vatican, in an immense arch room, full of all kinds of junk. There is absolutely nothing here that could have a value or could be vivid.

Dream: The whole project is finished. Everything is ready; I and my matters; for the whole humanity.

Dream: I walk through the Vatican. And I ask myself who has paid and still pays for all this, and under which conditions has all this been built. Hidden behind all of this is an immeasurable megalomania, a perverse suppression and exploitation.

Dream: A voice is speaking: "You are the new Messiah of humanity, and the guarantee for a good future."

Dream: I tell people: "Never again will I come back to this earth. I am only here for a visit and I have to accomplish a job. And you have to get your shit together yourself."

Dream: I tell the press: "You haven't got the slightest clue about what kind of punishment is waiting for you for having ignored me and having kept me from the people!"

Dream: "I have not come from millions of light years away to this earth, sent from God, to play here the cretin and idiot.

Dream (2008): I told people in a dream: "You have 10 years left to take strong measures to avoid the total collapse." But nobody listen.

Dream (2010): In 35-40 years everything will be over, the end, no more earth and no more humanity.

Dream (2015): The end of human evolution could be already in 20 years.

Therefore, with all the power of attorney from my spiritual (archetypal) authority I decide today:

Year 2014: I have closed the door to the paradise. I will not let a single soul into Paradise, apart from a few exceptions, until the evil octopus on this planet is detected and disclosed, until the truth is researched and clarified and until both are fully understood by the entire humanity. Everyone is summoned to work on this catharsis and renewal: Researchers, experts, scientists, journalists, politicians, legal professionals, CEOs, and all kinds of power holders and religious officials; but also all humans being in a state to contribute in any ways to this catharsis and renewal.

Every single person must be educated with the path that leads towards the fulfillment of the Archetypes of the Soul: the all-encompassing catharsis and the psychical-spiritual educational process, guided by the inner Spirit and the power of love. The day, one billion adults work on this process, I will re-open for these people the door to Paradise.
